

Top 10 Reasons to Perform Business Objects System Assessment Checklist

**Maria Wei, President, ATCG
Solutions**

maria.wei@atcgsolutions.com

About the Author

Maria Wei is the founder of ATCG Solutions and Oomi, a non-profit social media community. She has spent the last 10 years in Business Intelligence, Big Data and the Social Media sector helping companies integrate IT solutions with business needs. She has presented at universities and conferences about Business Intelligence. She is also the lead lecturer at the ATCG BI Academy. Before ATCG Solutions, Ms. Wei obtained dual bachelor degrees at age 20 and led the Business Objects practice at IBM GBS.

System Integration

Issues

- You have multiple systems and do not have single database for reporting

Implications

- Additional System Maintenance and Hardware Cost
- No Single Version of Truth
- Duplicate Data

Data Cleansing

Issues

- Master, Transactional and Hierarchy Data not in sync

Implications

- Inefficient business processes
- Inaccurate Billing
- Revenue Leakage

System Performance

Issues

- Many reports take longer than 15 seconds to run

Implications

- Lost Productivity
- Poor Report Design
- Low User Acceptance

Business Acceptance

Issues

- Low business user adoption

Implications

- Lowered ROI of Reporting Investment
- Development of Manual Work-Arounds

High IT Dependency

Issues

- Lack of ad-hoc reporting capability for the User Community

Implications

- Many Report Requirements Unmet
- Business Opportunities Missed
- Reactive instead Proactive business Decisions

Sizing & License

Issues

- User community changes cause the lack of clarity on hardware sizing and license structure

Implications

- Vendor Audits may yield surprise license cost
- System Performance Issues

Low Budget

Issues

- IT Projects objective needs to be met at a low cost model

Implications

- IT projects will not meet deadline to deliver
- Business Expectation not met

BI Strategy Roadmap

Issues

- No BI Roadmap
- No Best Practice implementation Roadmap

Implications

- Limited Ability to Seek Future Funding
- Missing Out on Benefits of Best Practices

Training

Issues

- No effective training for entire end-user community.

Implications

- Low End-User Acceptance
- Low Productivity
- Users will revert to excel
