

## eRentals

### Total Rental Visibility & Control

#### Features of Epiphany's eRentals include:

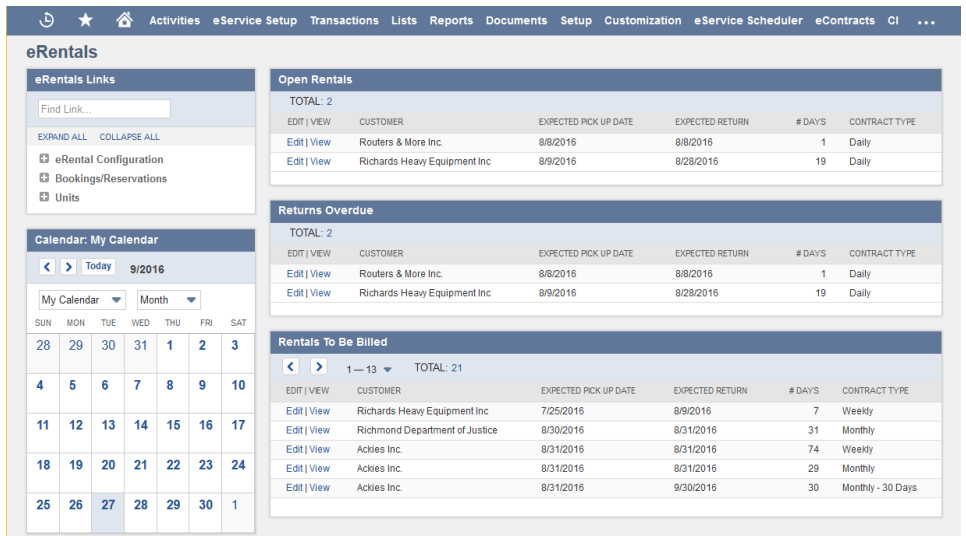

- Cloud based SaaS Rental Solution
- Rental and Sub-rental contract management
- Inventory Availability Management
- Control and Manage Pricing Rates
- Flexible Billing
- Monitor Pick-ups and Returns
- Track Maintenance, Repairs and Depreciation

#### Integrate Core Functions of Your Business

Eliminate the need for, and costs associated with, multiple business management systems. The seamless integration between rental, accounting and CRM modules form a comprehensive solution to the logistical and financial challenges commonly faced by business owners in the equipment rental industry.

#### Access and Analyze Your Most Valuable Data

The key to success in almost any rentals business is being able to easily identify profitability, who the largest customers are, and when maintenance costs associated with a particular piece of equipment exceeds its value. The e-Rentals powerful dashboard and automated report generation display the data needed in an instant to provide detailed insight, tracking and reporting of rental units.

The screenshot shows the eRentals dashboard with the following sections:

- eRentals Links:** Find Link, EXPAND ALL, COLLAPSE ALL, eRental Configuration, Bookings/Reservations, Units.
- Calendar: My Calendar:** Shows a calendar for 9/2016 with dates 28 through 30 highlighted.
- Open Rentals:**

TOTAL: 2
