Voicebrook to Exhibit at the 100th Annual USCAP Meeting

Voicebrook to demonstrate new product features and advanced reporting workflows

LAKE SUCCESS, NY February 22, 2011 – Voicebrook, the leader in Pathology speech recognition and reporting solutions, today announces that it will be exhibiting at the USCAP 2011 Annual Meeting at the Henry B. Gonzalez Convention Center in San Antonio, Texas. The exhibit hall is open from February 28th through March 2nd, and members of the Voicebrook team will be available in Booth 430 for demonstrations and discussion.

Voicebrook's VoiceOver® Enterprise solution is the only reporting software that was designed specifically for a Pathology environment and features a combination of both front-end speech recognition and traditional transcription workflow tools. The software was featured in the January 2011 issue of CAP TODAY, and was recognized as the de facto choice for laboratories looking to deploy speech recognition technology within a laboratory reporting environment.

VoiceOver® Enterprise is the most accurate, flexible, and easy to use speech recognition-based reporting solution for Pathology. Features include front-end speech recognition, delegated speech recognition, digital dictation, custom integration with over 16 AP/LIS products, hands-free microphone and foot pedal integration, simple visual and audio indicators, support tools, downtime tools, integration with Digital Imaging platforms, discrete and free-text templating tools, Speech Box RTF editor, and advanced scripting tools to support site-specific workflow customizations. In addition, Voicebrook provides access to Pathology reporting content including CAP electronic Cancer Checklists (eCC), a knowledge base of Pathology templates, and a customized Pathology vocabulary.

Joseph Desiderio, Voicebrook's President said, "We are pleased to be participating in the 100th anniversary of the USCAP Conference, and we look forward to meeting with clients, prospects and other vendors who share our passion for Pathology and Pathology reporting and informatics."
