

## Overview

We design and manufacture our FRP bridge decks to the unique performance requirements of your pedestrian bridge project. Our decks are available in a range of sizes, shapes and depths as well as different strength and stiffness properties for use with a range of bridge configurations. Our decks last more than 75 years with little to no maintenance.

## Performance Advantages

- Long lasting
- Superior strength
- Prefabricated bridge element
- Fast installation
- Custom colors
- Molded FPR decks
- Can be fabricated to fit custom designs

## Light Weight Deck

- Only 4 to 10 psf
- Less than 20 percent of reinforced concrete dead load

## Long Lasting Deck

- Low maintenance
- Corrosion resistant

## Deck Customization

- Any size, shape or skew
- Cross-slope or crown
- Non-slip wear surface
- Curbs
- Railing attachments
- Drainage scuppers
- Expansion joints
