

Overview

Our zero maintenance Fiberglass Reinforced Polymer (FRP) trail bridges eliminate the financial strain conventional bridge products can place on park operations budgets. FRP materials provide superior strength and resist corrosion from water, salt and chemicals. Our prefabricated bridges are easy to install.

Performance Advantages

- Zero Maintenance
- Prefabricated: Delivered to site fully assembled
- Fast installation
- Long life
- Aesthetic appeal
- Color options
- Non-slip wear surface

Bridge Configurations

Standard Span

- Ranges from 20 to 50 ft. long
- FRP deck
- Weathering steel beams
- Aluminum railing
