KSP Service Seminar

April 2009

Get the most out of your equipment. Attend the Schwing Bioset Service Seminar and receive the best training in the industry. With both classroom and hands-on instruction you will learn how to properly use and maintain your equipment. The classroom portion of the seminar is held in our training center with working models and cut-a ways of components. Our hands-on facility features several pieces of working equipment students can interact with.

The cost for the seminar is \$1195.00 USD. The fees do not include airfare, ground transportation to or from the airport, lodging or evening meals. Payment must be received prior to enrollment.

Classes run Tuesday through Thursday. Students should plan to arrive the Monday prior to their class and depart on the following Friday. Schwing Bioset has negotiated a special service seminar rate at an area hotel. We will provide daily transportation for students staying at this designated hotel to and from the seminar. Lodging information will be sent after enrollment form and payment have been received.

Class size is limited so we recommend registering early. The deadline for registration is twenty (20) days prior to the seminar start date. Sorry, but no applications will be accepted by phone. Any questions, please call our Training Department at (715) 247-3433.
