WebSite Grade 98/100 (Overall)

Website Grader Report for: www.barackobama.com

Keywords entered:

The SiteGrade is a custom score assigned to a website. It attempts to measure, in relative terms, the *effectiveness* of a website. We are attempting to measure the likelihood that a given website will be able to attract prospects and convert them into customers. SiteGrade is a relative measure, so it measures a website against a database of *other* websites.

Our proprietary algorithm uses a unique blend of over a dozen different variables including search engine data, website structure, approximate traffic, site performance and others. We take each of these variables and weigh them based on our assessment of their relevance.

The SiteGrade for **www.barackobama.com** is **98**. This means that of all the sites being considered in our algorithm, this site scores equal or higher than **98** percent of them.

The software is constantly being upgraded and the algorithm enhanced. The number of potential recommendations provided by the tool is also increasing frequently. Please check back often.

Google PageRank 6

From Google:

Google PageRank relies on the uniquely democratic nature of the web by using its vast link structure as an indicator of an individual page's value. In essence, Google interprets a link from page A to page B as a vote, by page A, for page B. But, Google looks at more than the sheer volume of votes, or links a page receives; it also analyzes the

page that casts the vote. Votes cast by pages that are themselves "important" weigh more heavily and help to make other pages "important."

Permanent Redirect Detected

Search engines often regard **www.barackobama.com** and **barackobama.com** as two different

websites unless you take specific measures to signal to them that is in the same site.

The best way to handle this situation is to setup what is known as a permanent redirect (or a "301" redirect) from one of these sites to the other.

We detected a properly configured permanent redirect for this website, so it is not being negatively impacted by a fragmentation of links across **www.barackobama.com** and **barackobama.com**

Conversion Methods

The WebSite grader attempts to measure both the ability for a website to *attract* traffic and the ability to *convert* that traffic into qualified leads and prospects.

In this section, the analyzer searches for common conversion mechanisms such as "calls to action". Examples include RSS feeds, email subscription forms and other ways whereby site visitors can engage the business.

RSS Feed Not Discovered

One of the best ways to get regular visitors to a website is to support an RSS feed.

RSS allows users to subscribe to site content. With RSS, users can automatically be notified when the site is updated. RSS is an industry standard. There are a variety of free RSS applications available that let site visitors subscribe and consume content.

Web Form Found

Seems there may be some type of signup or registration form for site visitors on this page.

We would suggest ensuring some type of simple subscription form is available that allows users to get email updates. This is a great way for visitors to express their interest in the company and its offering and for the business to stay in touch. Though RSS usage continues to increase, email is still what a majority of site visitors know and understand.
