# Ultimus BPM Suite 7.3

## The Fastest and Most Reliable Ultimus 7 Release

Ultimus BPM Suite 7.3 is the latest version release for current users of Ultimus 7, that brings many new enhancements and benefits to those who upgrade. V7.3 includes new features and improvements that will increase the usability of Ultimus BPM Suite when developing and maintaining process solutions.

Enhancements and features of Ultimus BPM Suite 7.3 include:

**Ultimus UATS/WebClient support** – Version 7.3 now supports Ultimus Advanced Task Service (UATS) with its end user environment, Ultimus WebClient 2015, which are available separately. This allows users to interact with their processes and tasks in a single browser-based UI dashboard with greater speed and flexibility.

**Improved Ultimus Engine and Server stability** – With Ultimus 7.3, users will experience a greatly improved BPM Server and Ultimus Engine. With increased robustness and stability, no issues were found during tests with over 100,000 incidents.

**Improved Ultimus Engine and Server performance** – Ultimus V7.3 has significantly improved Ultimus Engine and Server performance and responsiveness, allowing large amounts of data to be handled 5-20% faster. Ultimus Report generation and Ultimus Administrator operations are now even up to 5 times faster. This ensures V7.3 meets business goals without impact to systems performance.

**Unique performance optimization services** – Ultimus offers customer specific performance optimization services. This enables the Ultimus Professional Services team and Ultimus Support to analyze and optimize Ultimus 7.3 systems specific to you and your business for maximum performance.

**Support for the most recent Microsoft versions** – To ensure your process deployments are fully supported, Ultimus BPM Suite 7.3 also supports newer versions of Microsoft programs and technology. This includes support for Windows 8 / 8.1, IE 10 and IE 11, Windows Server 2012 / 2012 R2, MS SQL Server 2012, and Microsoft Office 2013. By supporting these latest versions, V7.3 allows you to protect your investment in process solutions and extend the value of your BPM initiatives.

# Ultimus BPM Suite 7.3

**Updated user interface** – End users who upgrade from Ultimus BPM Suite 7.1 will experience a fresh new look and feel of the process flow and client. With updated logos and icons that provide a more clean and crisp appearance, end users will be further engaged in driving process transformation within the organization.

Component	Description
UltAdmin	
Processes	Functions related to the administration of Workflow Processes.
Clients	Functions related to administration of Clients.
FloStation	Functions related to administration of FloStations.
License Utilization	Ultimus Licensing Information details
Advanced Administration	Functions related to Incidents, Tasks and Log Filters

## How to Upgrade

The upgrade to Ultimus 7.3 should only be performed by a trained Ultimus expert, as such an upgrade needs to be able to properly handle the complexity of the existing environment and involving technologies. Therefore, Ultimus is happy to assist or handle the full upgrade for you.

If you have not yet upgraded, sign up at [www.ultimus.com/73-upgrade](http://www.ultimus.com/73-upgrade). During an upgrade service call, your possible upgrade options will be discussed, and we will assist you with your plans to ensure an efficient upgrade.

*"The implementation of V7.3 has resulted in a plethora of benefits in many business areas, and most importantly, has increased the customer experience. The product is flexible and enables our bank to build workflows per business requirement. We thank Ultimus for their support and for enabling the transfer of knowledge to our bank."*
