Moog Videolarm Named as Finalist for the 2010 RCR Wireless Ecosystem Award
- 3G/4G camera housing designer recognized in Best Mobile Internet Device Company category -

ATLANTA, Oct 19, 2010 – Moog Videolarm, a leading designer and manufacturer of innovative, high-quality surveillance products announced today that it was named a finalist in the second annual RCR Wireless Ecosystem Award competition. Competing in the Best Mobile Internet Device Company category, Moog Videolarm was chosen out of 130 candidates.

The award recognizes Moog Videolarm for developing a mobile Internet device that has been successfully deployed on a mobile network and demonstrates best design practices, user interface, features, performance and power management. "It is an honor to be recognized for our innovative design, development and deployment of wireless security-based technologies that impact the mobile environment," said Jimmy Pfaffenberger, general manager, Moog Videolarm. "We appreciate the recognition and the opportunity to serve the wireless market with pioneering products. The response to the 3G/4G Liberty Dome has been incredible, and we expect this nod to increase that interest."

"Our program recognizes those contributions that have made an impact on the industry and the people it serves," said Jeff Mucci, managing partner of Arden Media and publisher of RCR Wireless News. The RCR Wireless Ecosystem Awards offer the opportunity to honor and showcase those companies that have demonstrated success, innovation and excellence in the mobile and wireless industry.

About Moog Videolarm, Inc.

Moog Videolarm, a subsidiary of Moog Inc., is a leading designer and manufacturer of innovative, high-quality surveillance products with unmatched customer service in the industry.
