

Online Induction Software

Perfect for Safety Inductions, Site Inductions or Job Specific Inductions

Administer inductions online.
No more paper based inductions.

Manage inductions better.
Track inductee status automatically.

Simple reminders.
Automatically send reminders and notifications.

Edit material easily.
Simple user interface design.
Brand as your own.

Run reports.
View and manage inductee progress and results.

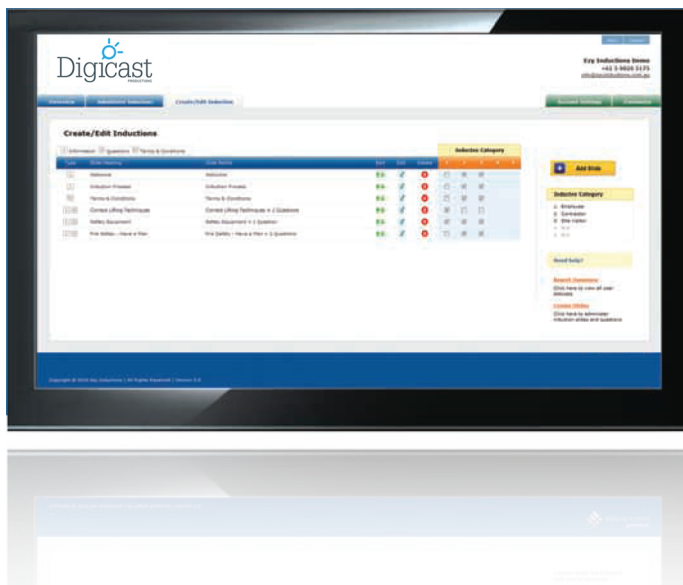

Free up your time.
Save time and money reducing face to face inductions.

Run your Inductions Online

Digicast offers a simple self-managed online induction system with full content control for you to access anytime and anywhere. So now your contractors or staff can be inducted before they get onsite.

Eliminate laborious face-to-face and classroom training and run highly engaging induction training online. Easily upload your own training materials such as video, text, audio and photos. Then, assess inductee understanding by adding quiz questions.

Track your Inductees

All the information required to track the current status of training with your entire workforce is now at your fingertips.

Inductees logon to undertake their induction training, get tested and upon successful completion of the course, receive a printable certificate. Each certificate has their details, receipt number, induction course name and a summary of their assessment results.

Induction administrators receive reports on test results, history of training courses undertaken and status reminders all at the one screen location. Now, it's really easy for one person to monitor the induction process.

Benefits

The Digicast online induction system is ideal for companies who want to centralize all of their training modules and track the induction status with staff and contractors.

Benefits include:

No per user charge – Unlimited users

There are no limits to the amount of users on your entire account. You can add as many as required.

Self-managed system – You have full control over the entire system

Your account gives you full content control. You upload your training materials at anytime.

Nothing to install – Ready to go

It's simple, easy and web-based. You don't need to download, install or configure anything (no IT department required!). All you need is a web browser and an Internet connection. It's as simple as visiting a web page.

Reduced overall costs – End to end

Automate your induction process, save time and money and enable employees and contractors to register and undertake their inductions online.

Rebrand as your own

Your interface can be branded with your company logo and corporate colours.

Safe, Private and Secure

Our platform is hosted on a redundant network from a clustered web server environment. Located in an Australian data centre, allows quick access for domestic users. It also relies on the Secure Sockets Layer (SSL) protocol to create a uniquely encrypted channel for private communications over the Internet.

Support

To help customers get the most out of the investment and maximize their induction systems performance, our professionals deliver the highest level of support and service.
