Property Owner, please Note... When an old roof is re-roofed, (particularly when the old roofing material is removed) there will be some debris that will fall into attic spaces and around the house. Areas inside the house, especially attics, are especially susceptible to debris infiltration. This is unavoidable. You can protect your belongings by covering light fixtures, pictures, and other items hanging from walls or from ceilings must be removed by you before the roofing job. These items are susceptible to falling due to the vibrations caused by our working on your roof. Thank you for your cooperation in this matter!
