As-printed tracking of print, copy, and scan activity

Track by area, paper size or Océ SmartClick

Tracks Océ Publisher, Repro Desk, Print Exec and more

Centralized user management

Web-based installation is quick and easy

Documents cost. Track them.

Argos manages expenses—not just meter counts, but the who, the what, the when and where of every print, copy, scan, fax, and more—so you'll finally get a handle on your document costs, reduce waste, lower costs, and impact your bottom line.

Argos OnBoard for Océ helps you track, analyze, recover, and reduce document expenses. Whether you're a school looking to track student printing, a company wanting to reduce expenses, or a professional firm charging for reimbursable expenses, Argos delivers the tools you need to intelligently manage your documents.

Argos tracks every plot, copy, and scan on your Océ devices, and records everything to a central database. Professionally designed reports make it easy to see your expenses with clarity.

The Argos OnBoard family of embedded print management software is available for most leading print and copy devices. Visit sepialine.com to learn more.

Pure Software

Argos OnBoard For Océ integrates directly with your Océ controller, so users can login directly on the LCD touchscreen panel. No terminals. No stands, arms, or mounts. And no spaghetti wiring behind the plotter. Nobody likes that. Instead you get clean, simple, intuitive software that's beautifully designed to do its job, then get out of the way. Users stay productive. Management get their statistics. Everybody wins. Installation is a piece of cake, too—no technician required. Just open Argos Manager, and in a few clicks, you're done.

Friction-Free Cost Recovery

If clunky popups, intrusive workflow, and unhappy employees are your notion of bill-back software, think again. Argos lets you print first and asks questions later. Everyone stays productive and on-track and, yet, completely accountable for their expenses. With Argos you'll get all the benefits of reimbursable chargeback with none of the pain.

Tracks the Way You Print

Océ offers many ways for users to send print jobs to the plotter. Web submission, Windows and Mac print queues, as well as Océ's popular Publisher, Repro Desk and Print Exec submission tools. You don't need to change your users' workflow for cost recovery to work - Argos can adapt to however you send jobs to the device.

Datasheet
