

Safety Asset Monitoring System *The Right Choice for Healthcare*

Most healthcare facilities struggle with safety compliance. Fire codes, The Joint Commission and OSHA all have standards healthcare administrators must follow, creating thousands of inspections each month. en-Gauge can help ensure safety assets are in place and ready when needed. en-Gauge's technology can also make certain equipment and hallways are free of obstruction, a leading issue in almost every healthcare audit.

- ✓ Best of breed wireless and asset tracking technologies (RTLS)
- ✓ Expandable platform including software and wireless technologies
- ✓ Automate physical inspections ensuring properly located, unobstructed, 24X7 compliant safety equipment
- ✓ Reduces exposure to risk and liability

Lower Costs and Increased Life Safety

Safety is the key! Most asset tracking installations focus on inventory only. By addressing both safety and cost reduction hospitals can create stable, expandable asset tracking systems their teams will adopt quickly.

en-Gauge's safety asset approach;

- ✓ Speeds cultural adoption of RTLS and wireless technologies
- ✓ Follows NFPA and building code standards
- ✓ Stable approach allows for broader monitoring applications
