

MIX-I-GO SMALL ENGINE FORMULA

MULTI-PURPOSE SOLUTION FOR ETHANOL PROBLEMS IN SMALL EQUIPMENT

MIX-I-GO SMALL ENGINE FORMULA is specially formulated for both two- and four-cycle engines, solving ethanol-related problems in gasoline engines for small equipment including both riding and push lawn mowers, lawn edgers, chain saws, leaf blowers, stand-alone generators, and other types of small gasoline-powered equipment.

SMALL ENGINE PROBLEMS WITH ETHANOL

The addition of ethanol in even minimal amounts has serious consequences upon small engine equipment. Ethanol is a damaging solvent, dissolving fuel lines, seals, and other plastic and rubber parts in the engine and fuel system. Left over time, this can destroy the investment you've made in your lawn mower and other small equipment. Is your equipment more than a year old? If so, then it's doubly susceptible to ethanol's harmful effects.

TWO-CYCLE ENGINE PROBLEMS WITH ETHANOL

Two-cycle engines have their own serious problems with ethanol fuel. Ethanol attracts water from the air and pulls it into the fuel. This causes serious problems in two-cycle engines that rely on oil mixed into the fuel to provide lubrication to critical engine parts. The water pulled in by the ethanol will actually displace and prevent the oil from bonding with engine parts. Over time this can cause serious damage to your two-cycle engine and equipment.

PERFORMANCE

We Made It First. We Make It Best.

THE SOLUTION FOR ETHANOL IN SMALL EQUIPMENT

Whether your engine is two-cycle or four-cycle, **MIX-I-GO SMALL ENGINE FORMULA** solves all ethanol-related fuel problems. **MIX-I-GO SMALL ENGINE FORMULA** is a multi-functional formula which contains a combustion modifier (for better fuel consumption and power), detergents (to combat deposits caused by ethanol solvency), lubricant (to protect rubber and plastic parts), deposit control agent and a powerful water-control surfactant package.

MIX-I-GO SMALL ENGINE FORMULA BENEFITS FOR ETHANOL

When used in gasoline or gasoline/ethanol blends in small engines, **MIX-I-GO SMALL ENGINE FORMULA** will:

- Reduce fuel consumption and restore lost performance caused by ethanol
- Protect critical parts from ethanol solvency
- Improve ease of startup and reduce smoking
- Remove carbon, varnish and gum deposits
- Clean fuel injectors, carburetors and throttle bodies
- Control excessive water buildup
- Stabilize fuel and keep it fresh

MIX-I-GO SMALL ENGINE FORMULA is simply the most complete, most effective solution you can buy to protect your small engines and equipment from ethanol damage and keep them running their best.

DOSAGE Use 1 oz **MIX-I-GO SMALL ENGINE FORMULA** for every 2 gallons of ethanol or gasoline fuel. One 8 oz. bottle treats 16 gallons. **MIX-I-GO SMALL ENGINE FORMULA** is available in convenient 8 oz bottles.
