

MARINE DEE-ZOL

**UNCOMPROMISED PERFORMANCE
GUARANTEED FOR WORK OR PLAY**

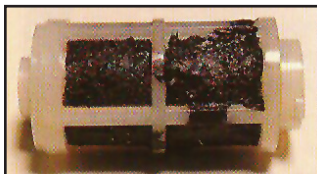

BENEFITS:

- **EXTENDS LIFE OF MARINE DIESEL ENGINES**
- **STABILIZES FUEL & ABSORBS WATER**
- **REDUCES EMISSIONS & INCREASES POWER**

MARINE DEE-ZOL IS SPECIFICALLY DESIGNED TO SOLVE ALL DIESEL FUEL RELATED PROBLEMS.

Marine diesel engines are required to operate continuously in a high-moisture environment. As a result, excessive water forms in the fuel system, which leads to microbial contamination and possible filter blockage. High concentrations of sludge, which are usually present in marine fuel, can also clog the fuel filter and centrifuge. Additionally, marine diesel engines face the problem of constant carbon build-up in the engine caused by excessive idling. **MARINE DEE-ZOL's** concentrated formula solves these and other fuel-related problems.

Removes Sludge and Microbial Growth

**Fuel Filter:
Before Treatment**

**Fuel Filter:
After Treatment**

MOISTURE ELIMINATOR

MARINE DEE-ZOL contains a special moisture eliminator that disperses condensation and other free water in the fuel system. Because the water remains dispersed in a one-micron size, it is carried along with the diesel fuel and passes through the injector nozzle into the combustion chamber.

- **CLEANS INJECTORS & CONSERVES FUEL**
- **PRESERVES PLASTIC/RUBBER PARTS**
- **LUBRICATES FUEL SYSTEM**

DEPOSIT CONTROL

Deposits can occur on the fuel injectors, which impede fuel delivery. Wasted, unburned fuel reduces power, performance and economy. **MARINE DEE-ZOL's** deposit control agents remove deposits from the combustion chamber and injectors with regular use.

FUEL STABILIZER

Sludge forms in all diesel stocks, regardless of how fast the fuel is consumed. This is especially true in fuel that sits for long periods of time. **MARINE DEE-ZOL's** moisture eliminator and metal deactivators slow the oxidation reactions that form fuel sludge. Fuel aging and sludge formation are reduced and the BTU value of the fuel is preserved for longer periods of time. **MARINE DEE-ZOL** prevents fuel aging and eliminates sludge formation, thereby retaining the BTU value in the fuel.

CETANE ENHANCEMENT

MARINE DEE-ZOL contains PB4500 Power Booster, which increases power and performance with any type of diesel fuel.

DOSAGE

Add **MARINE DEE-ZOL** to tank before refilling diesel: 16 oz to 300 gallons; 1 gallon to 2,400 gallons. For initial treatment, use a double dosage of **MARINE DEE-ZOL** to remove build-up.
