DESCRIPTION

DIGEST PLUS is an exciting new product that is composed of specially bred enzyme/bacterial cultures that actually attack and break down the uric acid molecules. It does its job by digesting the source, just the way Nature does it. Works fast, in minutes rather than days or weeks, with zero environmental impact.

DIRECTIONS FOR USE

TILE, GROUT, URINALS, AND OTHER HARD SURFACES:

1. The area should first be cleaned of excess material. If the area is not moist, use lukewarm water on the surface to be treated with **DIGEST PLUS**.
2. Insert a trigger sprayer into the bottle and you have a ready-to-use product which will eliminate the odors produced from the organic material and decomposed salts associated with urine. Spray on area to be treated and allow to air dry. **DIGEST PLUS** can also be used as a mop on application for restroom floors. Apply to floor and allow to air dry.

CARPET AND UPHOLSTERY:

1. Remove surface soils, excess waste, and protein contaminates with plain lukewarm water or with a mild neutral detergent.
2. Spray or wipe on problem area until moist.
3. Keep the carpet or upholstered item moist for at least 4 hours. (6-12 hours in extreme cases).
4. In severe cases you may have to treat carpet pad and flooring separately with **DIGEST PLUS**.

This product has met the DuPont test for use on "New Generation" carpet. **DIGEST PLUS** does not affect the stain resistant properties.

PRECAUTIONS

Avoid contact with eyes and skin. Wear rubber gloves when handling. Keep out of reach of children.

PRACTICAL TREATMENTS

EYES: Flush with water for 15 minutes. If irritation persists, obtain medical attention.
SKIN: Wash skin with water.
INGESTION: Drink two glasses of water. Obtain medical attention.

FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY
