# Portable Solutions Group Company Overview

ISO Shipping Container Modification Specialists

**P**ORTABLE SOLUTIONS GROUP INC. (PSG) specializes in ISO Shipping Container Modifications and creating innovative portable solutions through the use of state of the art techniques and technology. As the parent company of DropBox Inc. and Modular Security Systems Inc. Portable Solutions Group brings a wealth of knowledge, training and much needed expertise to the shipping container modification industry.

## MODULAR SECURITY SYSTEMS INC.

MSSI was founded in 2005 after the increased security of a post 9/11 world drove attention towards soft target sites and water ways in the United States. Taking into consideration requirements like those laid out by MARSEC, MSSI conceptualized a product that had never been created before and sought a patent for what is now known as the Modular Access Control (MAC) Portal. From the MAC Portal the V-Series MAC Portal, Vehicle Access Control (VAC) Portals, and modular guard booths were created in response to the varying needs of customer in the U.S. and around the world.

## DROPBOX INC.

DropBox Inc. was founded in 2000 after the realization that there was a need for custom ISO shipping container modifications in and around the Tri-State of Ohio, West Virginia, and Kentucky. After establishing a customer base and a product line of value added container modifications DropBox Inc. via the use of the internet became a global name in the shipping container modification industry. Through the development of products like the Sanitation Station, the Shower Shack, and the DropOffice™ DropBox Inc. has established a fleet of revenue generating rental units and has more recently built highly customized units for the Department of Homeland Security, the U.S. Army, Navy, and other Governmental agencies.

# PSG Quality Assurance

"Doing the right thing in all we do."

**\* Modern Manufacturing Facility \* 40,000 sq ft Manufacturing Floor \* 5 acre Product Yard \* Lean Techniques Employed Throughout \* Each unit Undergoes In-Process Inspection and a Finished Goods Quality Audit \***

PSG employs a quality assurance system to ensure all product realization activity is driven by the voice of the customer. Our QA system is modeled on the ISO9000 standard, and incorporates tools and concepts from the leading methodologies, including Malcolm Baldrige, Six Sigma, and Lean Manufacturing. Processes are defined and documented to capture current best practices. Key metrics are systematically reviewed to drive continuous improvement. This disciplined approach enables us to live out our Quality Policy: "Do the right thing in all that we do."

## Portable Perimeter Security Solutions

Modular Security Systems Inc. (MSSI) is an Ohio-based intellectual properties holding company with expertise in designing and manufacturing unique portable solutions to address ever-changing worldwide security issues. MSSI modifies ISO shipping containers into Patented Modular Access Control (MAC) Portals that can come equipped with a guard office, full height, high security turnstiles, and access control technology based on customers site specific needs.

MSSI sales and core market segments include worldwide ports, refineries and petrochemical plants, military installations, global industrial contractors, mass transit and large events.

MSSI can be found online at [www.SecuredByMAC.com](http://www.SecuredByMAC.com). Here you can view floorplans, pictures, projects, and stay up to date on what's new at MSSI.

MSSI has a longstanding relationship serving the industrial, military, and commercial markets with portable perimeter security solutions including MAC Portals with turnstiles, vehicle access control gates, and modular guard booths.

What Can MSSI Do for You?

MSSI employs a team of certified engineers, CAD draftsmen, and professional portable perimeter security specialists that can work with you to design the right security solution for your site specific needs.

Regardless of whether you need a standard MAC Portal or any of our other portable perimeter security solutions MSSI can work with you to create the custom solution you need in a successful, cost effective solution that minimizes the problems, time, and money spent on traditional on-site construction projects.

Contact MSSI today to learn more about what We can do for You!

# DropBox Inc.

## Custom ISO Shipping Container Solutions

DropBox Inc. is a custom ISO shipping container modification company that provides both standard containerized products and custom builds for shipment world-wide.

Standard products include but are not limited to the Sanitation Station (Commercial Quality Running Water Restrooms), Portable Shower facilities, DropOffice (Mobile Office), Mobile Tool Cribs, Decontamination Shower Units, Chemical Storage, High Security Storage, Containerized Power Systems, Portable Laundry Units, and Welding Training Stations.

Our Design Team can modify any of our current products or work to Engineer Custom ISO Shipping Container Modification Solutions.

DropBox Inc. can be found online at [www.DropBoxInc.com](http://www.DropBoxInc.com). Here you can view floorplans, pictures, projects, and stay up to date with the latest portable solutions offered from DropBox Inc. by visiting our Shipping Container Modification Blog.

DropBox Inc. has a longstanding relationship serving the industrial and commercial construction industry as well as the U.S. Military, Homeland Security, Department of Energy, and other Governmental Entities.

# DropOffice™

Portable, Stackable, Climate Controlled Offices/Break Rooms

20', 40', and Custom Sizes Available

**DROP BOX**  
Custom Container Modifications

# Portable Blast Rated Modules (BRM)

## Containerized Blast Rated Offices, Break Rooms, and Tool Crib

**Product Description:** Blast Rated Modules (BRM) are ideal for break rooms, offices, and tool cribs in locations where risk of explosions are present. Reduction of risk associated with the risk of working and having tool storage space in and around work sites like refineries, chemical plants, and power plants. Portable solutions are perfect for an adaptable work site instead of the logistics associated with permanent stick built structures. Minimal requirements for foundation. Climate controlled steel reinforced to reduce risk of injury. Turnkey safety solution.

**Product Specifications:** Includes: New Container, Structurally Re-Inforced PE Stamped and Certified Design. Fully Engineered to obtain a PSI Over Rating of 1.5, 3.0, 5.0, and 8.0. Fully insulated, high security blast rated solid steel door, structural tube steel door casings, AC/Heat, flooring, overhead lighting, breaker box, CAT-5 computer connections, all conduit runs completed, one 220 60/50hz power connection required on external junction box, overhead lighting above entry and exit, exterior flood lighting on both faces, spray on slip resistant/water proof rubberized flooring or tile floors. Sizes: H 8'6" x W 8' x L 20', H 8'6" x W 8' x L 40'.

# Portable Work Stations & Laboratory Modules

Containerized Work Stations and Customizable Repair Units

**Product Description:** Portable Work Stations and Modular Laboratories are ideal for offices work station, hose repair facilities, on site chemical labs and a wide array of other work space/repair functions. These portable solutions are perfect for an adaptable work space for remote locations as compared to traditional permanent stick built structure. Minimal requirements for foundation. These climate controlled steel reinforced units can be equipped with any number of customer specified equipment and fixtures. Completely turnkey work space and laboratory solutions.

**Product Specifications:** Includes: New Container, Structurally Re-Inforced PE Stamped and Certified Design. Fully insulated, door, structural tube steel door casings, AC/Heat, flooring, overhead lighting, breaker box, CAT-5 computer connections, all conduit runs completed, one electrical power connection required on external junction box, overhead lighting above entry and exit, exterior flood lighting. Sizes: H 8'6" x W 8' x L 20', H 8'6" x W 8' x L 40', and custom sizes available.

**DROP BOX**  
Custom Container Modifications

# Portable Welding Training-Testing Unit

Containerized Welding Training-Testing and Coupon Box

**Product Description:** Portable Welding Training-Testing Units are Ideal for on site testing, training, and welding coupon attainment. As opposed to sending employees off site to perform regular testing, training, and recertification as required these modular units give contractors the ability to keep workers on site for testing and training. Minimal requirements for foundation. Climate controlled steel reinforced to office in one end of the unit eliminates possible need for additional trailer rental at site. Turnkey safety solution.

**Product Specifications:** Includes: New Container, Structurally Re-Inforced PE Stamped and Certified Design. Fully Engineered, insulated, structural tube steel door casings, AC/Heat, flooring, overhead lighting, breaker box, 120/208 electrical connection with 400 amp service, all conduit runs completed, overhead lighting above entry and exit, exterior flood lighting on both faces, six welding stations, spray in skid resistant/water proof rubberized flooring under all welding stalls. Sizes: H 8'6" x W 8' x L 20', H 8'6" x W 8' x L 40'.

**DROP BOX**  
Custom Container Modifications

# Sanitation Stations

## Containerized Industrial Quality Running Water Restrooms

**Product Description:** Sanitation Station: Ideal for remote locations where access to water and waste lines are not available. These portable restroom solutions are perfect for an adaptable work space for remote locations as compared to traditional permanent stick built structure. Minimal requirements for foundation and setup onsite. These self contained, climate controlled restrooms are steel reinforced and can be plumbed into existing water and sewer lines but are not required to be as they have built in fresh water and waste water holding tanks. Completely turnkey restrooms with flushable toilets, urinals, and running water sinks.

**Product Specifications:** Includes: New Container, Structurally Re-Inforced PE Stamped and Certified Design. Fully insulated, door, structural tube steel door casings, AC/Heat, flooring, overhead lighting, breaker box, toilets, sinks, urinals, all conduit runs completed, one electrical power connection required on external junction box, overhead lighting above entry and exit, exterior flood lighting. Sizes: H 8'6" x W 8' x L 20', H 8'6" x W 8' x L 40', and custom sizes/designs are available upon customer request.

# Shower Shacks

Self Contained Industrial Quality Running Shower Modules

Customizable Floor Plans

Self Contained and Non-Self Contained Models

**DROP BOX**  
Custom Container Modifications

# Decontamination Station

## 3-5 Stage Decontamination Shower Modules

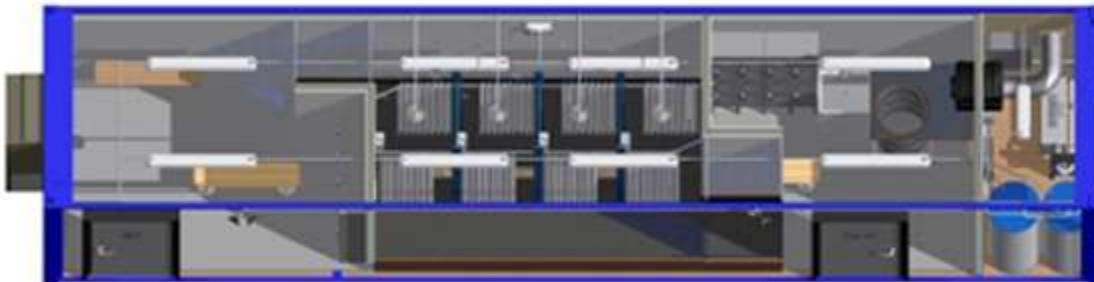

Complete with Air and Water Filtrations Systems

Clean Room

Shower Room

Equipment/Dirty Room

# Modular Chemical Storage Units

## Containerized Chemical Storage

**Product Description: Chemical Storage:** Ideal for storage of hazardous chemicals. These portable chemical storage units come complete with raised/grated flooring for secondary containment, fire suppression/alarm system, fire resistant coatings, ventilation systems, hazardous chemical placards, and other chemical storage associated features as requested per our customers. Save Time and Money compared to traditional stick built structures. Minimal requirements for foundation and setup onsite. Completely turnkey chemical storage systems. All units come with a 12-month warranty. Sizes: H 8'6" x W 10' x L 8', H 8'6" x W 20' x L 8', H 8'6" x W 40' x L 8'.
