With Electrically Heated SCR Hose Assemblies from Parker’s Parflex Division, a cleaner exhaust system means a cleaner environment. Designed for heating and conveying DEF (Diesel Exhaust Fluid) throughout the SCR system on commercial vehicles, Parflex hoses are made to handle both on-road and off-road applications while helping you stay Tier IV and EPA '10 compliant. Combine these hoses with other high value Parflex fluid conveyance products (pilot lines, grease lines, hydraulic hoses, etc.) so your customer can enjoy best in class durability and performance.

Unlike the competition’s electrically heated hose, Parflex SCR hoses lock-in the heating elements with an extruded sheath for added protection and long-lasting uniform heating. The overmold on the fittings provide impact and water resistance, making the hoses suitable for multiple environments.

Each configuration utilizes materials specifically formulated for their application. All Parflex SCR hose assemblies have multiple options that allow customization by the equipment manufacturer/end user.

**Advantages**

- Consistent thaw - more reliable than coolant heated lines.
- Multiple options available to fit every application.
- Protective Overmolding
  - Protection against water ingestion and damage of electrical components.
  - Bolsters fitting strength and impact resistance.
- Corrugated heat shield offers abrasion resistance.
- Assembled and designed in USA
- The Parflex Division is third party certified for ISO 14001 and TS 16959.

---

**SCR – Selective Catalytic Reduction**  The process of injecting an Urea solution into the exhaust stream onto a catalyst. The injection starts a chemical reaction, changing Nitrogen Oxides to Nitrogen and Water.
**S0/S1**

**Suction/Throttle Line Design**

Parflex SCR Hose Assembly
Suction/Throttle Line

- Thermoplastic core tube with fabric reinforcement
- Stainless steel heating wire
- Extruded thermoplastic jacket
- Optional heat/abrasion shield

**Polyamide Pressure Line Design**

Parflex SCR Hose Assembly
Polyamide Pressure Line

- Specialty high temperature polyamide core with fabric reinforcement
- Stainless steel heating wire
- Extruded high temperature thermoplastic jacket
- Heat/abrasion shield

**Operating Parameters S0/S1**

- Temperature Range:
  - -40°F to 158°F (-40°C to 70°C)
  - Spikes to 221°F (105°C)
- Available in 12VDC or 24VDC design

**Operating Parameters P1**

- Temperature Range:
  - -40°F to 248°F (-40°C to 120°C)
  - Spikes to 284°F (140°C)
- Internal/Fluid Temp: 140°F Max, per Cummins AEB
- Available in 12VDC or 24VDC design
