

# I.C.E.™ Ibex® Customizable Extension

## Arm-Free Scanning!

The I.C.E.™ (Ibex® Customizable Extension) is a unique accessory for the Ibex offering flexibility unparalleled in the industry. The I.C.E. device was designed and tested in conjunction with veterinarians skilled in **Arm-Free Scanning**. The I.C.E. is engineered to lessen fatigue and stress on the user's arm and shoulder promoting a longer and more productive career. Features of the I.C.E. include:

- Easily adjustable angle to allow 0° to 45° for use in a variety of reproductive diagnostic procedures
- Flex section of the I.C.E. is easy to bend to exactly the desired angle
- Proven design for ease of Arm-Free scanning
- Safer and less stressful on both user and animal
- The I.C.E. extension allows easy insertion or removal of the probe  
*(Compatible with the Ibex L6.2MHz and CLI3.8MHz transducer)*
- Ruggedized design ensuring durability in the most demanding field conditions
- Manufactured using FDA approved materials
- Made in the U.S.A.

Smooth, Safe Construction

Compatible with the L6.2MHz or CLI3.8MHz transducer

Secure

Easily adjustable angle to allow 0° to 45°
