

TOP 10 REASONS TO USE VIDEO CONFERENCING

1. Allows for real-time face-to-face communication with peers and patients who reside in offices across town or across the country
2. Performs face-to-face translation services with Passport to Languages for non-English speaking patients
3. Reduces travel costs and time out of the office
4. Fits into any budget
5. Presents quick return on investment
6. Allows for computer image and document viewing (e.g., echocardiograms, CT Scans, etc.) through the video conference stream
7. Ensures ease of use and management
8. Boosts efficiency and productivity by allowing meetings and appointments to be scheduled anytime, any place
9. Provides a low-cost, high impact way to extend distance learning
10. Provides upper management with better visibility of employees, allowing them to connect more often and more quickly

HEALTHCARE VIDEO SOLUTIONS

REDUCING COSTS WHILE MAXIMIZING PRODUCTIVITY

One of the best ways to improve the quality of health care is to improve real-time interactive communication in health care environments. Solutionz offers the best way for any health care provider to increase the level of care, control costs, address staffing shortages, serve rural patients, and stay ahead of the competition.

TOMORROW'S TECHNOLOGY TODAY

Because Solutionz understands the problems and challenges that face health care providers, we offer the only portfolio of end-to-end, scalable, secure, award-winning, collaborative Polycom and TANDBERG solutions. Both Polycom's and TANDBERG's industry-leading software solutions are committed to innovation, and development is focused on consistently improving the collaboration experience.

Today, patients and providers alike are taking advantage of the benefits of video conferencing. Live digital video and high-speed satellite connections enable specialists to evaluate and diagnose illnesses in real time, without requiring patients to travel long distances. Hospitals are leveraging the power of IP video networks to link clinics, consultants, specialists and patients, extending the reach of health care into remote areas. Medical professionals are also enjoying the convenience of accessing professional development classes, certification programs, and training through video conferencing.

THE GREEN FACTS OF VIDEO CONFERENCING

Business travel is responsible for 18% of an enterprise's carbon emissions. Video conferencing, however:

- Lowers an organization's carbon footprint by significantly reducing the need for travel and travel-related CO2 emissions
- Enables dispersed workgroups in today's global enterprises to meet and collaborate "virtually"

MAKE GREAT THINGS HAPPEN WITH SOLUTIONZ

In today's technology driven world, the ability to conduct real-time communication and collaboration has become critical to an organization's survival. See how you can achieve great things by going with Solutionz, the market leader in end-to-end voice, video, and data
