ATU

Antenna Simulator

Antenna Simulators are used to tune the coupler. Southern Avionics sells and can ship with your NDB, an antenna simulator for use during installation, testing, and maintenance.

Antenna Simulator is used when:

1. Operating a complete system in a lab environment.
2. Simulating the antenna in the field to troubleshoot possible ATU or Antenna problems.

NDB Transmitter

Test Load

Test Loads are highly recommended for installation and testing to protect your valuable equipment. Southern Avionics sells, and can ship with your NDB, a 50 ohm non-reactive test load for use during installation, testing, and maintenance.

Test Load is used when:

1. Operating Transmitter in a lab environment.
2. Troubleshooting the secondary Transmitter in the field.

Bird Watt Meters and Elements are highly recommended for installation and testing to protect your valuable equipment.

Bird Watt Meters and Elements are used when:

1. Operating Transmitter in a lab environment.
2. Measuring the power flow and load match in the field.
