Application:

A Symmetrical "T" Antenna is recommended for use with a 125 - 250 Watt transmitter if sufficient land is available. It is the optimal land based antenna system.

Signal range is a result of field strength which depends on TX power, electrical length and ground conditions

120 ft. (37m) grounded towers are required. They may be purchased from SAC or self-supplied. Towers are placed 300 ft. (91m) apart and have a 115 ft. (35m) vertical radiator and a 2 wire 280 ft. (85m) top hat. 3 guy wires support each tower.

The Antenna is designed for use with the PC1000C/3 or PC3000 Antenna Tuning Units which can have an optional AC power supply installed.
