FEATURE	SPECIFICATION
Height	5 ft. (1.5m) [lightning rod only]
Material	Copper-clad
Weight	27 lbs. (12kg) [one rod] 54 lbs. (15kg) [both rods]

### Application:

The Lightning Rod provides protection for your antenna and ATU from lightning strikes. Each lightning rod comes threaded with nuts.

Other materials included to ground the tower are: ground rod, rod clamp, copper wire, and antenna clamp.

Each tower requires a lightning rod. This equals two (2) lightning rods for each Symmetrical "T" antenna unit.

SAC support towers are made for use with SAC Symmetrical "T" Antennas.
