FEATURE	SPECIFICATION
Resistance	50 Ohms
Power Rating	1000 Watts
Current Rating	4.5 Amps, Max @ 190KHz
Frequency of Operation	190-650KHz
Height	7in / 18cm
Length	24in / 61cm
Width	5in / 13cm
Weight	8lbs / 4kg
Optional Equipment	Dummy Antenna
Compatibility	Up to 1000 Watts

Application:

Dummy Loads are highly recommended for installation and testing to protect your valuable equipment.

Southern Avionics sells, and can ship with your NDB, a 50 Ohm non-reactive dummy load for use during installation, testing, and maintenance.

Dummy Load is used when:

1. Operating Transmitter in a lab environment.
2. Troubleshooting the secondary Transmitter in the field.
