

Be Innovative

The Intellect 8 BPM platform is designed to empower users to innovate with Smart Enterprise Apps to enhance and streamline business processes. Intellect 8 offers the industry's most advanced capabilities for connecting apps, people and processes. The intuitive BPM platform enables non-programmers to innovate with processes, data, workflow, and customizable reporting, with the ability to integrate with legacy enterprise applications.

Intellect 8 is an app-centric platform that empowers everyone to innovate, run and manage an entire library of Smart Enterprise Apps, which can be instantly deployed as a native mobile app to any iOS and Android device. With the use of Intellect's intuitive drag-and-drop interface, no programming or software coding is needed from design to deployment. The ease of use and no programming customization provides a rapid to launch solution, ideal for organizations seeking a quick time to value deployment.

Empower Your Business

Instead of altering your unique business processes to fit into a pre-developed application or spending copious amounts of money on a custom programmed solution, the Intellect platform allows you to configure flexible solutions quickly, allowing for any needed process changes on the fly. Intellect 8 is designed to scale to all business needs, while providing rapid turn-around time from design to deployment. Leverage the Intellect BPM platform to enhance your current processes and innovate your enterprise to become more streamlined, connected and productive.

Connecting apps, people and processes

intellect

at a glance...

Native Mobile Apps

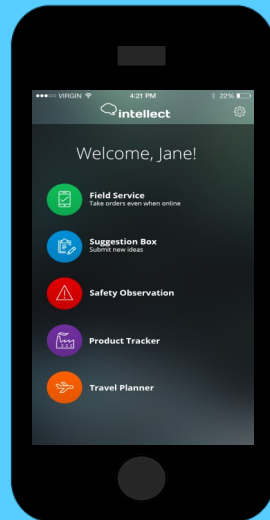

Stay connected and capture data even when internet connectivity is lost

Library of Unlimited Enterprise Mobile Apps

Run and manage all of your business apps on one central platform
