

Intellect 8 BPM Platform

Smart Enterprise Apps

The Intellect 8 BPM Platform empowers everyone to innovate with Smart Enterprise Apps. Design and launch simple to highly complex, mission-critical enterprise apps without the need for programming or software coding.

Intellect Smart Enterprise Apps are designed to be business friendly, rapid to launch, and empowering for business users.

Enterprise Mobility Made Easy

Deploy enterprise apps to the web or any mobile device in minutes. To increase productivity in the field, deploy enterprise apps as a “native” mobile app on any iOS or Android with a few clicks, allowing for continued use at all times even when internet connectivity is lost.

Empower Everyone to Innovate

The Intellect 8 BPM Platform enables business users to create Smart Enterprise Apps with smart forms, integrated enterprise data, automated workflow, advanced reporting capabilities, and the ability to integrate with legacy enterprise applications. Intellect is ideal for enterprises with constrained IT resources or business executives who want to get things done without requiring a software programmer.

Intellect 8 offers the industry's most advanced capabilities for connecting apps, people and processes

Connecting apps, people and processes

● **Smart Enterprise Apps**

Create, launch and manage one or an entire library of Smart Enterprise Apps ranging from simple to highly complex, mission-critical apps.

● **Easily Create Forms**

Create smart forms to capture information and photos anywhere, anytime, and instantly build a database in the back-end.

● **Automate with Workflow**

Assign tasks and actions to individuals or groups, automatically send reminders or notifications by email or text message, and see where a task is at all times.

● **Custom Reports**

Easily develop and run custom, dynamic reports to gain real-time insight, improve performance, cut costs and make smarter and faster decisions.

● **Integrate Other Apps**

Leverage legacy applications by integrating with ERP, CRM or other enterprise systems through business logic, web services, XML and simple LDAP/AD integration.

● **Go Mobile in Minutes**

Deploy any Smart Enterprise App built on the Intellect 8 BPM Platform as a “native” mobile app on any iOS and Android device in minutes.

● **No Programming**

No programming or software coding from design to deployment, providing a rapid to launch solution ideal for organizations with constrained IT resources or business executives who want to build apps without involving software programmers.

● **Instantaneous Updates**

When you input or change data in the office or on the go, all data is immediately synced up and available for the right users at the right time.

● **Security**

Enterprise-grade security defined on a granular level (field, table, template, app etc.) based on a single user, user group or by roles.

● **Cloud or On-Premise**

Host your Intellect Smart Enterprise Apps in the cloud or on your servers (on-premises).
