Smart Enterprise Apps

Intellect is an award winning leader in Business Process Management (BPM) software for Smart Enterprise Apps. As an app-centric platform, Intellect enables users to create, run and manage an entire library of **simple to highly complex, mission critical enterprise apps**, without the need for programming or software coding from design to launch.

Smart Enterprise Apps created on the Intellect platform can be instantly deployed as a "native" mobile app on any iOS and Android device, allowing for continued use even when internet connectivity is lost.
