Operations and Algebraic Thinking

1.OA

GRADE 1 S	TANDARDS / DESCRIPTION	SADLIER COM	MMON CORE PROGRESS MATHEMATICS, GRADE 1
	nt and solve problems involving and subtraction.		
1.OA.A.1	Use addition and subtraction within 20 to solve word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.	Lesson 1	Problem Solving: Addition—pp. 10–17
		Lesson 2	Problem Solving: Subtraction—pp. 18–25
1.OA.A.2	Solve word problems that call for addition of three whole numbers whose sum is less than or equal to 20, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.	Lesson 3	Problem Solving: Addition of Three Numbers—pp. 26–33
	and and apply properties of operations relationship between addition and tion.		
1.OA.B.3	Apply properties of operations as strategies to add and subtract. ²	Lesson 41	Sort and Count—pp. 195–198
	Examples: If $8 + 3 = 11$ is known, then $3 + 8 = 11$ is also known. (Commutative property of addition.) To add $2 + 6 + 4$, the second two numbers can be added to make a ten, so $2 + 6 + 4 = 2 + 10 = 12$. (Associative property of addition.)		
	² Students need not use formal terms for these properties.		
1.OA.B.4	Understand subtraction as an unknown-addend problem.	Lesson 5	Relate Addition and Subtraction Facts—pp. 42–49
	For example, subtract $10 - 8$ by finding the number that makes 10 when added to 8 .		
Add and	d subtract within 20.		
1.OA.C.5	Relate counting to addition and subtraction (e.g., by counting on 2 to add 2).	Lesson 6	Relate Counting to Addition and Subtraction—pp. 50–57
1.OA.C.6	Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as counting on; making ten (e.g., $8+6=8+2+4=10+4=14$); decomposing a number leading to a ten (e.g., $13-4=13-3-1=10-1=9$); using the relationship between	Lesson 7	Addition and Subtraction Facts to 10 (fluency)—pp. 58–65
		Lesson 8	Addition and Subtraction Facts to 20—pp. 66–73

GRADE 1 STANDARDS / DESCRIPTION

continued from previous page –

addition and subtraction (e.g., knowing that 8 + 4 = 12, one knows 12 - 8 = 4); and creating equivalent but easier or known sums (e.g., adding 6 + 7 by creating the known equivalent 6 + 6 + 1 = 12 + 1 = 13).

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 1

Work with addition and subtraction equations.

1.OA.D.7 Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false.

For example, which of the following equations are true and which are false? 6 = 6, 7 = 8 - 1, 5 + 2 = 2 + 5, 4 + 1 = 5 + 2.

1.OA.D.8 Determine the unknown whole number in an addition or subtraction equation relating three whole numbers.

For example, determine the unknown number that makes the equation true in each of the equations $8 + ? = 11, 5 = \square - 3, 6 + 6 = \square$.

Lesson 9 Addition and Subtraction Equations—pp. 74-81

Lesson 10 Find Missing Numbers in Equations—pp. 82-

Lesson 9 Addition and Subtraction Equations—pp. 74–81

Number and Operations in Base Ten

1.NBT

GRADE 1 STANDARDS / DESCRIPTION	SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 1

Extend the counting sequence.

1.NBT.A.1 Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral. Lesson 11 Count to 120—pp. 96–103

Lesson 12 Read and Write Numbers—pp. 104–111

Understand place value.

1.NBT.B.2 Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases:

■ 1.NBT.B.2a 10 can be thought of as a bundle of ten ones — called a "ten."

 1.NBT.B.2b The numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight, or nine ones.

GRADE 1 STANDARDS / DESCRIPTION		SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 1	
Measure lengths indirectly and by iterating length units.			
1.MD.A.1	Order three objects by length; compare the lengths of two objects indirectly by using a third object.	Lesson 18	Compare and Order Lengths—pp. 162–169

Measurement and Data

1.MD

Grade 1 Standards / Description		SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 1	
1.MD.A.2	Express the length of an object as a whole number of length units, by laying multiple copies of a shorter object (the length unit) end to end; understand that the length measurement of an object is the number of same-size length units that span it with no gaps or overlaps. Limit to contexts where the object being measured is spanned by a whole number of length units with no gaps or overlaps.	Lesson 19	Measure Length in Length Units—pp. 170–177
Tell and	write time.		
1.MD.B.3	Tell and write time in hours and half-hours using analog and digital clocks.	Lesson 20	Tell Time —pp. 178–185
Represe	ent and interpret data.		
1.MD.C.4	Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another.	Lesson 22	Use Tables—pp. 194–207
Geon	netry		1.0
GRADE 1 S	TANDARDS / DESCRIPTION	SADLIER COM	IMON CORE PROGRESS MATHEMATICS, GRADE 1
Reason	with shapes and their attributes.		
1.G.A.1	Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes (e.g., color, orientation, overall size); build and draw shapes to possess defining attributes.	Lesson 23	Identify Shapes—pp. 208–215
1.G.A.2	Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape. ¹	Lesson 24	Two-Dimensional Shapes—pp. 216–223
		Lesson 25	Three-Dimensional Shapes—pp. 224–231
	1 Students do not need to learn formal names such as
