Op	perations and Algebraic Thinki	ng	1.OA
GRAI	DE 1 STANDARDS / DESCRIPTION	SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 1	
	present and solve problems involving lition and subtraction.		
1.	Use addition and subtraction within 20 to solve word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.	Lesson 1	Problem Solving: Addition—pp. 10–17
		Lesson 2	Problem Solving: Subtraction—pp. 18–25
2.	Solve word problems that call for addition of three whole numbers whose sum is less than or equal to 20, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.	Lesson 3	<b>Problem Solving: Addition of Three</b> <b>Numbers</b> —pp. 26–33
anc	derstand and apply properties of operations I the relationship between addition and traction.		
3.	Apply properties of operations as strategies to add and subtract. <sup>3</sup>	Lesson 41	Sort and Count—pp. 195–198
	Examples: If $8 + 3 = 11$ is known, then $3 + 8 = 11$ is also known. (Commutative property of addition.) To add $2 + 6$ + 4, the second two numbers can be added to make a ten, so $2 + 6 + 4 = 2 + 10 = 12$ . (Associative property of addition.)		
	<sup>3</sup> Students need not use formal terms for these properties.		
4.	Understand subtraction as an unknown-addend problem.	Lesson 5	<b>Relate Addition and Subtraction Facts</b> —pp. 42–49
	For example, subtract 10 – 8 by finding the number that makes 10 when added to 8.		
Ado	d and subtract within 20.		
5.	Relate counting to addition and subtraction (e.g., by counting on 2 to add 2).	Lesson 6	Relate Counting to Addition and Subtraction—pp. 50–57
6.	Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as counting on; making ten (e.g., $8 + 6 = 8 + 2 + 4 = 10 + 4 = 14$ ); decomposing a number leading to a ten (e.g., $13 - 4 = 13 - 3 - 1 = 10 - 1 = 9$ ); using the relationship between addition and subtraction (e.g., knowing that $8 + 4 = 12$ , one knows $12 - 8 = 4$ ); and creating equivalent but easier or known sums (e.g., adding $6 + 7$ by creating the known equivalent $6 + 6 + 1 = 12 + 1 = 13$ ).	Lesson 7	Addition and Subtraction Facts to 10 (fluency)—pp. 58–65
		Lesson 8	Addition and Subtraction Facts to 20—pp. 66–73

1.OA

### **Operations and Algebraic Thinking GRADE 1 STANDARDS / DESCRIPTION** Work with addition and subtraction equations. 7. Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false. For example, which of the following equations are true and which are false? 6 = 6, 7 = 8 - 1, 5 + 2 = 2 + 5, 4 + 1 = 5 + 2. 8. Determine the unknown whole number in an addition or subtraction equation relating three whole numbers. For example, determine the unknown number that makes the equation true in each of the equations $8 + ? = 11, 5 = \Box$ $-3, 6+6=\Box$ .

# Number and Operations in Base Ten

**GRADE 1 STANDARDS / DESCRIPTION** 

#### Extend the counting sequence.

Count to 120, starting at any number less than 120. In 1. this range, read and write numerals and represent a number of objects with a written numeral.

#### Understand place value.

- 2. Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases:
  - 10 can be thought of as a bundle of ten ones a. called a "ten."
  - b. The numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight, or nine ones.
  - The numbers 10, 20, 30, 40, 50, 60, 70, 80, 90 refer c. to one, two, three, four, five, six, seven, eight, or nine tens (and 0 ones).
- 3. Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols >, =, and <.

#### SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 1

Lesson 9	Addition and Subtraction Equations—pp. 74– 81
Lesson 10	Find Missing Numbers in Equations—pp. 82– 95
Lesson 9	Addition and Subtraction Equations—pp. 74– 81

### 1.NBT

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 1

Read and Write Numbers—pp. 104–111
<b>Relate Counting to Addition and Subtraction</b> —pp. 50–57
Understand Place Value: Tens and Ones—pp. 112–119
Understand Place Value: Tens and Ones—pp. 112–119
Understand Place Value: Tens and Ones—pp. 112–119
Compare Numbers—pp. 120–127

Nι	umber and Operations in Base	Т	Гen 1.	
GRADE 1 STANDARDS / DESCRIPTION			SADLIER CON	IMON CORE PROGRESS MATHEMATICS, GRADE 1
Use place value understanding and properties of operations to add and subtract.				
4.	Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. Understand that in adding two-digit numbers, one adds tens and tens, ones and ones; and sometimes it is necessary to compose a ten.		Lesson 15	Add Two-Digit Numbers—pp. 128–135
5.	Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used.		Lesson 16	Find 10 More and 10 Less—pp. 136–143
6.	Subtract multiples of 10 in the range 10–90 from multiples of 10 in the range 10–90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.		Lesson 17	Subtract Multiples of 10—pp. 144–161
Me	easurement and Data			1.MD
GRAI	de 1 Standards / Description		SADLIER CON	IMON CORE PROGRESS MATHEMATICS, GRADE 1
Measure lengths indirectly and by iterating length units.				
1.	Order three objects by length; compare the lengths of two objects indirectly by using a third object.		Lesson 18	Compare and Order Lengths—pp. 162–169
2.	Express the length of an object as a whole number of length units, by laying multiple copies of a shorter object (the length unit) end to end; understand that the length measurement of an object is the number of		Lesson 19	<b>Measure Length in Length Units</b> —pp. 170– 177

Lesson 20 Tell Time—pp. 178–185

with no gaps or overlaps.

Tell and write time.

and digital clocks.

3.

same-size length units that span it with no gaps or overlaps. *Limit to contexts where the object being measured is spanned by a whole number of length units* 

Tell and write time in hours and half-hours using analog

Measurement and Data

# ⊔ 1.MD

GRADE 1 STANDARDS / DESCRIPTION		SADLIER COM	SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 1	
Rep	present and interpret data.			
4.	Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another.	Lesson 22	<b>Use Tables</b> —pp. 194–207	
Ge	eometry		1.G	
GRADE 1 STANDARDS / DESCRIPTION		SADLIER COM	MON CORE PROGRESS MATHEMATICS, GRADE 1	
Reason with shapes and their attributes.				
1.	Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes (e.g., color, orientation, overall size); build and draw shapes to possess defining attributes.	Lesson 23	Identify Shapes—pp. 208–215	
2.	Compose two-dimensional shapes (rectangles, squares,	Lesson 24	Two-Dimensional Shapes—pp. 216–223	
	trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape. <sup>4</sup>	Lesson 25	Three-Dimensional Shapes—pp. 224–231	
	<sup>4</sup> Students do not need to learn formal names such as "right rectangular prism."			
3.	Partition circles and rectangles into two and four equal shares, describe the shares using the words <i>halves</i> , <i>fourths</i> , and <i>quarters</i> , and use the phrases <i>half of</i> , <i>fourth</i> <i>of</i> , and <i>quarter of</i> . Describe the whole as two of, or four of the shares. Understand for these examples that decomposing into more equal shares creates smaller shares.	Lesson 26	Equal Shares—pp. 232–239
