Domain: Operations and Algebraic Thinking

GRADE 4 STANDARD	CODE / STANDARD	SADLIER CO	MMON CORE PROGRESS MATHEMATICS, GRADE 4
Cluster 1: Use numbers to sc (MAJOR CLUSTER)	the four operations with whole live problems.		
MAFS.4.OA.1.1	Interpret a multiplication equation as a comparison, e.g., interpret $35 = 5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5. Represent verbal statements of multiplicative comparisons as multiplication equations.	Lesson 1	Interpret Multiplication Equations as Comparisons—pp. 10–17
	Cognitive Complexity: Level 1: Recall		
MAFS.4.OA.1.2	Multiply or divide to solve word problems involving multiplicative comparison, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem, distinguishing multiplicative comparison from additive comparison.	Lesson 2	Problem Solving: Use Multiplication and Division to Make Comparisons—pp. 18–25
	<u>Cognitive Complexity</u> : Level 2: Basic Application of Skills & Concepts		
MAFS.4.OA.1.3	Solve multistep word problems posed with whole numbers and having whole- number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.	Lesson 3	Problem Solving: Multistep Problems —pp. 26–33
	<u>Cognitive Complexity</u> : Level 2: Basic Application of Skills & Concepts		
MAFS.4.OA.1.a* (*new standard)	Determine whether an equation is true or false by using comparative relational thinking. For example, without adding 60 and 24, determine whether the equation 60 + 24 = 57 + 27 is true or false.		Online at SadlierConnect.com
MAFS.4.OA.1.b* (*new standard)	Determine the unknown whole number in an equation relating four whole numbers using comparative relational thinking. For example, solve $76 + 9 = n + 5$ for n by arguing that nine is four more than five, so the unknown number must be four greater than 76.		Online at SadlierConnect.com

	a. Find all factor pairs for a whole number in the range 1–100.	Lesson 4	Find Factors and Multiples for Whole Numbers—pp. 34–41	
	 Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. 	Lesson 4	Find Factors and Multiples for Whole Numbers—pp. 34–41	
	 Determine whether a given whole number in the range 1–100 is prime or composite. 	Lesson 4	Find Factors and Multiples for Whole Numbers—pp. 34–41	
Cluster 3: Gen (Additional Clus	erate and analyze patterns.			
MAFS.4.OA.2.3	Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. For example, given the rule "Add 3" and the starting number 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way.	Lesson 5	Generate and Analyze Number and Shape Patterns—pp. 42–49	
	Cognitive Complexity: Level 2: Basic			

Application of Skills & Concepts

Domain: Number and Operations in Base Ten

GRADE 4 STANDARD	CODE / STANDARD	SADLIER COM	MMON CORE PROGRESS MATHEMATICS, GRADE 4
	eralize place value understanding whole numbers.		
MAFS.4.NBT.1.1	Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. For example, recognize that 700 ÷ 70 = 10 by applying concepts of place value and division.	Lesson 6	Understand Place Value of Whole Numbers—pp. 56–63
	Cognitive Complexity: Level 1: Recall		
MAFS.4.NBT.1.2	Read and write multi-digit whole numbers using base-ten numerals, number names, and expanded form. Compare two multi- digit numbers based on meanings of the digits in each place, using >, =, and < symbols to record the results of comparisons.	Lesson 7	Read, Write, and Compare Whole Numbers—pp. 64–71
	<u>Cognitive Complexity</u> : Level 2: Basic Application of Skills & Concepts		
MAFS.4.NBT.1.3	Use place value understanding to round multi-digit whole numbers to any place.	Lesson 8	Apply Place Value to Round Whole Numbers—pp. 72–79
	Cognitive Complexity: Level 1: Recall		
	place value understanding and operations to perform multi-digit		
MAFS.4.NBT.2.4	Fluently add and subtract multi-digit whole numbers using the standard algorithm.	Lesson 9	Add and Subtract Fluently with Whole Numbers—pp. 80–87
	Cognitive Complexity: Level 1: Recall		
MAFS.4.NBT.2.5	Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	Lesson 10	Multiply Whole Numbers: Use Place Value— pp. 88–95
	<u>Cognitive Complexity</u> : Level 2: Basic Application of Skills & Concepts		

Domain: Number and Operations in Base Ten

GRADE 4 STANDARD CODE / STANDARD

MAFS.4.NBT.2.6 Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.

> <u>Cognitive Complexity</u>: Level 2: Basic Application of Skills & Concepts

Lesson 11	Multiply Whole Numbers: Use Properties of Operations—pp. 96–103
Lesson 12	Divide Whole Numbers: Use Place Value— pp. 104–111
Lesson 13	Divide Whole Numbers: Use Properties of Operations—pp. 112–119

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

Domain: Number and Operations—Fractions

GRADE 4 STANDARD CODE / STANDARD

Cluster 1: Extend understanding of fraction equivalence and ordering. (MAJOR CLUSTER)

MAFS.4.NF.1.1	Explain why a fraction a/b is equivalent to a fraction $(n \times a)/(n \times b)$ by using visual fraction models, with attention to how the number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions. <u>Cognitive Complexity</u> : Level 3: Strategic Thinking & Complex Reasoning	Lesson 14	Understand Equivalent Fractions—pp. 126– 133 Write Equivalent Fractions—pp. 134–141
		Lesson 15	
nume e.g., b nume bench that co two fra Record symbo conclu	Compare two fractions with different numerators and different denominators, e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as 1/2. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols >, =, or <, and justify the conclusions, e.g., by using a visual fraction model.	Lesson 16	Compare Two Fractions—pp. 142–149
	<u>Cognitive Complexity</u> : Level 2: Basic Application of Skills & Concepts		

Domain: Number and Operations—Fractions

d Code / Standard	SADLIER CON	MON CORE PROGRESS MATHEMATICS, GRADE 4
d fractions from unit fractions by extending previous gs of operations on whole		
Understand a fraction a/b with $a > 1$ as a sum of fractions $1/b$.		
<u>Cognitive Complexity</u> : Level 2: Basic Application of Skills & Concepts		
a. Understand addition and subtraction of fractions as joining and separating parts referring to the same whole.	Lesson 17	Add and Subtract Fractions with Like Denominators—pp. 150–157
b. Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions, e.g., by using a visual fraction model. <i>Examples:</i> $3/8 = 1/8 + 1/8 + 1/8 + 1/8 + 3/8 = 1/8 + 2/8$; $2 1/8 = 1 + 1 + 1/8 = 8/8 + 8/8 + 1/8$.	Lesson 18	Decompose a Fraction as a Sum of Fractions—pp. 158–165
c. Add and subtract mixed numbers with like denominators, e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction.	Lesson 19	Add and Subtract Mixed Numbers with Like Denominators—pp. 166–173
d. Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators, e.g., by using visual fraction models and equations to represent the problem.	Lesson 20	Problem Solving: Add and Subtract Fractions—pp. 174–181
Apply and extend previous understandings of multiplication to multiply a fraction by a whole number.		
<u>Cognitive Complexity</u> : Level 2: Basic Application of Skills & Concepts		
a. Understand a fraction a/b as a multiple of $1/b$. For example, use a visual fraction model to represent $5/4$ as the product $5 \times (1/4)$, recording the conclusion by the equation $5/4 = 5 \times (1/4)$.	Lesson 21	Multiply Unit Fractions by Whole Numbers—pp. 182–189
	 extending previous gs of operations on whole Understand a fraction <i>a/b</i> with <i>a</i> > 1 as a sum of fractions 1/<i>b</i>. <u>Cognitive Complexity</u>: Level 2: Basic Application of Skills & Concepts a. Understand addition and subtraction of fractions as joining and separating parts referring to the same whole. b. Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions, e.g., by using a visual fraction model. Examples: 3/8 = 1/8 + 1/8 + 1/8; 3/8 = 1/8 + 2/8; 2 1/8 = 1 + 1 + 1/8 = 8/8 + 8/8 + 1/8. c. Add and subtract mixed numbers with like denominators, e.g., by replacing each mixed numbers with like denominators, e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction. d. Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators, e.g., by using visual fraction models and equations to represent the problem. Apply and extend previous understandings of multiplication to multiply a fraction by a whole number. <u>Cognitive Complexity</u>: Level 2: Basic Application of Skills & Concepts a. Understand a fraction <i>a/b</i> as a multiple of 1/<i>b</i>. For example, use a visual fraction model to represent 5/4 as the product 5 × (1/4), recording the conclusion by the equation 5/4 = 5 × 	d fractions from unit fractions by extending previous gs of operations on whole Understand a fraction a/b with a > 1 as a sum of fractions 1/b. Cognitive Complexity: Level 2: Basic Application of Skills & Concepts a. Understand addition and subtraction of fractions as joining and separating parts referring to the same whole. b.
