2.1 Numbers and Operations

(B) Numbers & Operations in Base Ten

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

CC.2.1.4.B.1

Apply place value concepts to show an understanding of multi-digit whole numbers.

CC.2.1.4.B.2

Use place value understanding and properties of operations to perform multi-digit arithmetic.

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

4.NBT.1

Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. *For example, recognize that $700 \div 70 = 10$ by applying concepts of place value and division.*

4.NBT.2

Read and write multi-digit whole numbers using base-ten numerals, number names, and expanded form. Compare two multi-digit numbers based on meanings of the digits in each place, using $>$, $=$, and $<$ symbols to record the results of comparisons.

4.NBT.3

Use place value understanding to round multi-digit whole numbers to any place.

4.NBT.4

Fluently add and subtract multi-digit whole numbers using the standard algorithm.

4.NBT.5

Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

Lesson 6

Understand Place Value of Whole Numbers—pp. 56–63

Lesson 7

Read, Write, and Compare Whole Numbers—pp. 64–71

Lesson 8

Read, Write, and Compare Whole Numbers—pp. 64–71

Lesson 9

Add and Subtract Fluently with Whole Numbers—pp. 80–87

Lesson 10

Multiply Whole Numbers: Use Place Value—pp. 88–95

2.1 Numbers and Operations

(B) Numbers & Operations in Base Ten

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

4.NBT.6.

Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.

Lesson 11

Multiply Whole Numbers: Use Properties of Operations—pp. 96–103

Lesson 12

Divide Whole Numbers: Use Place Value—pp. 104–111

Lesson 13

Divide Whole Numbers: Use Properties of Operations—pp. 112–119

2.1 Numbers and Operations

(C) Numbers & Operations—Fractions

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

CC.2.1.4.C.1

Extend the understanding of fractions to show equivalence and ordering.

4.NF.1

Explain why a fraction a/b is equivalent to a fraction $(n \times a)/(n \times b)$ by using visual fraction models, with attention to how the number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions.

Lesson 14

Understand Equivalent Fractions—pp. 126–133

Lesson 15

Write Equivalent Fractions—pp. 134–141

4.NF.2

Compare two fractions with different numerators and different denominators, e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as $1/2$. Recognize that comparisons are valid only when the two fractions refer to

Lesson 16

Compare Two Fractions—pp. 142–149

– continued on next page –

2.1 Numbers and Operations

(C) Numbers & Operations—Fractions

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

CC.2.1.4.C.2

Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers.

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

– continued from previous page –

the same whole. Record the results of comparisons with symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual fraction model.

4.NF.3

Understand a fraction a/b with $a > 1$ as a sum of fractions $1/b$.

- b. Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions, e.g., by using a visual fraction model.
Examples: $3/8 = 1/8 + 1/8 + 1/8$; $3/8 = 1/8 + 2/8$; $2 1/8 = 1 + 1/8 = 8/8 + 8/8 + 1/8$

4.NF.3

Understand a fraction a/b with $a > 1$ as a sum of fractions $1/b$.

- a. Understand addition and subtraction of fractions as joining and separating parts referring to the same whole.
- c. Add and subtract mixed numbers with like denominators, e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction.

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

Lesson 18

Decompose a Fraction as a Sum of Fractions—pp. 158–165

Lesson 17

Add and Subtract Fractions with Like Denominators—pp. 150–157

Lesson 19

Add and Subtract Mixed Numbers with Like Denominators—pp. 166–173

2.1 Numbers and Operations

(C) Numbers & Operations—Fractions

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

CC.2.1.4.C.3

Connect decimal notation to fractions, and compare decimal fractions (base 10 denominator, e.g., $.19/100$).

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

- d. Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators, e.g., by using visual fraction models and equations to represent the problem.

4.NF.4

Apply and extend previous understandings of multiplication to multiply a fraction by a whole number.

- a. Understand a fraction a/b as a multiple of $1/b$. *For example, use a visual fraction model to represent $5/4$ as the product $5 \times (1/4)$, recording the conclusion by the equation $5/4 = 5 \times (1/4)$.*
- b. Understand a multiple of a/b as a multiple of $1/b$, and use this understanding to multiply a fraction by a whole number. *For example, use a visual fraction model to express $3 \times (2/5)$ as $6 \times (1/5)$, recognizing this product as $6/5$. (In general, $n \times (a/b) = (n \times a)/b$.)*
- c. Solve word problems involving multiplication of a fraction by a whole number, e.g., by using visual fraction models and equations to represent the problem. *For example, if each person at a party will eat $3/8$ of a pound of roast beef, and there will be 5 people at the party, how many pounds of roast beef will be needed? Between what two whole numbers does your answer lie?*

4.NF.5

Express a fraction with denominator 10 as an equivalent fraction with denominator 100, and use this technique to

– continued on next page –

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

Lesson 20

Problem Solving: Add and Subtract Fractions—pp. 174–181

Lesson 21

Multiply Unit Fractions by Whole Numbers—pp. 182–189

Lesson 22

Multiply Fractions by Whole Numbers—pp. 190–197

Lesson 23

Problem Solving: Multiply Fractions by Whole Numbers—pp. 198–205

Lesson 24

Add Fractions: Denominators of 10 and 100—pp. 206–213

2.1 Numbers and Operations

(C) Numbers & Operations—Fractions

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

– continued from previous page –

add two fractions with respective denominators 10 and 100. For example, express $\frac{3}{10}$ as $\frac{30}{100}$, and add $\frac{3}{10} + \frac{4}{100} = \frac{34}{100}$.

4.NF.6

Use decimal notation for fractions with denominators 10 or 100. For example, rewrite 0.62 as $\frac{62}{100}$; describe a length as 0.62 meters; locate 0.62 on a number line diagram.

4.NF.7

Compare two decimals to hundredths by reasoning about their size. Recognize that comparisons are valid only when the two decimals refer to the same whole. Record the results of comparisons with the symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual model.

Lesson 25

Write and Compare Decimal Fractions—pp. 214–221

Lesson 25

Write and Compare Decimal Fractions—pp. 214–221

2.2 Algebraic Concepts

(A) Operations and Algebraic Thinking

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

CC.2.2.4.A.1

Represent and solve problems involving the four operations.

4.OA.1

Interpret a multiplication equation as a comparison, e.g., interpret $35 = 5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5. Represent verbal statements of multiplicative comparisons as multiplication equations.

Lesson 1

Interpret Multiplication Equations as Comparisons—pp. 10–17

2.2 Algebraic Concepts

(A) Operations and Algebraic Thinking

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

CC.2.2.4.A.2

Develop and/or apply number theory concepts to find factors and multiples.

CC.2.2.4.A.4

Generate and analyze patterns using one rule.

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

4.OA.2

Multiply or divide to solve word problems involving multiplicative comparison, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem, distinguishing multiplicative comparison from additive comparison.

4.OA.3

Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.

4.OA.4

Find all factor pairs for a whole number in the range 1–100. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. Determine whether a given whole number in the range 1–100 is prime or composite.

4.OA.5

Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. *For example, given the rule “Add 3” and the starting number 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way.*

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

Lesson 2

Problem Solving: Use Multiplication and Division to Make Comparisons—pp. 18–25

Lesson 3

Problem Solving: Multistep Problems—pp. 26–33

Lesson 4

Find Factors and Multiples for Whole Numbers—pp. 34–41

Lesson 5

Generate and Analyze Number and Shape Patterns—pp. 42–49

2.3 Geometry

(A) Geometry

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

CC.2.3.4.A.1

Draw lines and angles and identify these in two-dimensional figures.

CC.2.3.4.A.2

Classify two-dimensional figures by properties of their lines and angles.

CC.2.3.4.A.3

Recognize symmetric shapes and draw lines of symmetry.

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

4.G.1

Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in two-dimensional figures.

4.G.2

Classify two-dimensional figures based on the presence or absence of parallel or perpendicular lines, or the presence or absence of angles of a specified size. Recognize right triangles as a category, and identify right triangles.

4.G.3

Recognize a line of symmetry for a two-dimensional figure as a line across the figure such that the figure can be folded along the line into matching parts. Identify line-symmetric figures and draw lines of symmetry.

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

Lesson 34

Draw and Identify Points, Lines, and Angles—pp. 304–311

Lesson 35

Classify Two-Dimensional Figures—pp. 312–319

Lesson 36

Identify Lines of Symmetry—pp. 320–327

2.4 Measurement, Data, and Probability

(A) Measurement Data

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

CC.2.4.4.A.1

Solve problems involving measurement and conversions from a larger unit to a smaller unit.

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

4.MD.1

Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb., oz.; l, ml; hr., min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. *For example, know that 1 ft. is 12 times as*

– continued on next page –

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

Lesson 26

Convert Customary Measurement Units—pp. 234–241

Lesson 27

Convert Metric Measurement Units—pp. 242–249

2.4 Measurement, Data, and Probability

(A) Measurement Data

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

CC.2.4.4.A.4

Represent and interpret data involving fractions using information provided in a line plot.

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

– continued from previous page –

long as 1 in. Express the length of a 4 ft. snake as 48 in. Generate a conversion table for feet and inches listing the number pairs (1, 12), (2, 24), (3, 36),...

4.MD.2

Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.

4.MD.3

Apply the area and perimeter formulas for rectangles in real world and mathematical problems. For example, find the width of a rectangular room given the area of the flooring and the length, by viewing the area formula as a multiplication equation with an unknown factor.

4.MD.4

Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$). Solve problems involving addition and subtraction of fractions by using information presented in line plots. *For example, from a line plot find and interpret the difference in length between the longest and shortest specimens in an insect collection.*

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

Lesson 28

Problem Solving: Measurement—pp. 250–257

Lesson 29

Problem Solving: Apply Area and Perimeter Formulas—pp. 258–265

Lesson 30

Problem Solving: Use Line Plots—pp. 266–273

2.4 Measurement, Data, and Probability

(A) Measurement Data

PA COMMON CORE STANDARDS FOR MATHEMATICS, GRADE 4

CC.2.4.4.A.6

Measure angles and use properties of adjacent angles to solve problems.

COMMON CORE STATE STANDARDS FOR MATHEMATICS, GRADE 4

4.MD.5.

Recognize angles as geometric shapes that are formed wherever two rays share a common endpoint, and understand concepts of angle measurement:

- a. An angle is measured with reference to a circle with its center at the common endpoint of the rays, by considering the fraction of the circular arc between the points where the two rays intersect the circle. An angle that turns through $\frac{1}{360}$ of a circle is called a “one-degree angle,” and can be used to measure angles.
- b. An angle that turns through n one-degree angles is said to have an angle measure of n degrees.

4.MD.6

Measure angles in whole-number degrees using a protractor. Sketch angles of specified measure.

4.MD.7

Recognize angle measure as additive. When an angle is decomposed into non-overlapping parts, the angle measure of the whole is the sum of the angle measures of the parts. Solve addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems, e.g., by using an equation with a symbol for the unknown angle measure.

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 4

Lesson 31

Understand Angle Measures—pp. 274–281

Lesson 31

Understand Angle Measures—pp. 274–281

Lesson 32

Use a Protractor to Measure Angles—pp. 282–289

Lesson 33

Problem Solving: Find Unknown Angle Measures—pp. 290–297
