SADLIER

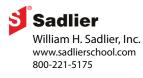

Common Core Progress Mathematics

Aligned to the Colorado Academic Standards in Mathematics

Fifth Grade

Contents

- 2 1. Number Sense, Properties, and Operations
- 6 2. Patterns, Functions, and Algebraic Structures
- 7 3. Data Analysis, Statistics, and Probability
- 7 4. Shape, Dimension, and Geometric Relationships

	lard: 1. Number Sense, Prop	erties, a	and Operations		
-	 Prepared Graduates: Understand the structure and properties of our number system. At their most basic level numbers are abstract symbols that represent real-world quantities 				
-	and skills students master: . The decimal number system describes place value panets and forms the foundation for efficient algorithms are specified as a second structure of the second structu		tionships that are repeated in large and small		
Fifth Grai	de Evidence Outcomes	SADLIER CON	MON CORE PROGRESS MATHEMATICS, GRADE 5		
Students o	an:				
represei	that in a multi-digit number, a digit in one place nts 10 times as much as it represents in the place to and 1/10 of what it represents in the place to its left. .NBT.1)	Lesson 4	Understand Place Value—pp. 40–47		
i.	Explain patterns in the number of zeros of the product when multiplying a number by powers of 10. (CCSS: 5.NBT.2)	Lesson 5	Powers of 10: Use Patterns and Whole- Number Exponents—pp. 48–55		
ii.	Explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. (CCSS: 5.NBT.2)	Lesson 5	Powers of 10: Use Patterns and Whole- Number Exponents—pp. 48–55		
iii.	Use whole-number exponents to denote powers of 10. (CCSS: 5.NBT.2)	Lesson 5	Powers of 10: Use Patterns and Whole- Number Exponents—pp. 48–55		
b. Read, w 5.NBT.3)	rite, and compare decimals to thousandths. (CCSS:				
i.	Read and write decimals to thousandths using base-ten numerals, number names, and expanded form. (CCSS: 5.NBT.3a)	Lesson 6	Read and Write Decimals to Thousandths — pp. 56–63		
ii.	Compare two decimals to thousandths based on meanings of the digits in each place, using >, =, and < symbols to record the results of comparisons. (CCSS: 5.NBT.3b)	Lesson 7	Compare Decimals to Thousandths —pp. 64– 71		
	e value understanding to round decimals to any CCSS: 5.NBT.4)	Lesson 8	Round Decimals: Use Place Value—pp. 72–79		
	like measurement units within a given ement system. (CCSS: 5.MD)				
i.	Convert among different-sized standard measurement units within a given measurement system. (CCSS: 5.MD.1)	Lesson 25	Convert Customary Measurement Units—pp. 226–233		
		Lesson 26	Convert Metric Measurement Units—pp. 234– 241		

FIFTH GR	ade Evidence Outcomes	SADLIER CON	IMON CORE PROGRESS MATHEMATICS, GRADE 5
ii.	Use measurement conversions in solving multi- step, real world problems. (CCSS: 5.MD.1)	Lesson 25	Convert Customary Measurement Units—pp. 226–233
		Lesson 26	Convert Metric Measurement Units—pp. 234– 241

Standard: 1. Number Sense, Properties, and Operations

Prepared Graduates:

Are fluent with basic numerical and symbolic facts and algorithms, and are able to select and use appropriate (mental math, paper and pencil, and technology) methods based on an understanding of their efficiency, precision, and transparency

Concepts and skills students master:

2. Formulate, represent, and use algorithms with multi-digit whole numbers and decimals with flexibility, accuracy, and efficiency

Fifth Grade Evidence Outcomes		SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 5	
Students	can:		
	/ multiply multi-digit whole numbers using standard nms. (CCSS: 5.NBT.5)	Lesson 9	Multiply Fluently with Multi-Digit Numbers— pp. 80–87
b. Find wł 5.NBT.6	nole-number quotients of whole numbers. (CCSS:)		
i.	Use strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. (CCSS: 5.NBT.6)	Lesson 10	Divide Whole Numbers: Use Place Value Strategies—pp. 88–95
		Lesson 11	Divide Whole Numbers: Use Properties of Operations—pp. 96–103
ii.	Illustrate and explain calculations by using equations, rectangular arrays, and/or area models. (CCSS: 5.NBT.6)	Lesson 10	Divide Whole Numbers: Use Place Value Strategies—pp. 88–95
	(CC33. 3.1401.0)	Lesson 11	Divide Whole Numbers: Use Properties of Operations—pp. 96–103
c. Add, sul (CCSS: 5	btract, multiply, and divide decimals to hundredths. 5.NBT.7)		
i.	Use concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and	Lesson 12	Add and Subtract Decimals to Hundredths— pp. 104–111
	subtraction. (CCSS: 5.NBT.7)	Lesson 13	Multiply Decimals to Hundredths—pp. 112– 119
		Lesson 14	Divide Decimals to Hundredths —pp. 120–127

Sadlier Common Core Progress Mathematics, Grade 5, Aligned to the Colorado Academic Standards in Mathematics Grade Level Expectation: Fifth Grade

FIFTH GRA	de Evidence Outcomes	SADLIER COM	MMON CORE PROGRESS MATHEMATICS, GRADE 5
ii.	Relate strategies to a written method and explain the reasoning used. (CCSS: 5.NBT.7)	Lesson 12	Add and Subtract Decimals to Hundredths— pp. 104–111
		Lesson 13	Multiply Decimals to Hundredths—pp. 112– 119
		Lesson 14	Divide Decimals to Hundredths—pp. 120–127
d. Write ar	nd interpret numerical expressions. (CCSS: 5.OA)		
i.	Use parentheses, brackets, or braces in numerical expressions, and evaluate expressions with these symbols. (CCSS: 5.OA.1)	Lesson 1	Use Grouping Symbols and Evaluate Numerical Expressions—pp. 10–17
ii.	Write simple expressions that record calculations with numbers, and interpret numerical expressions without evaluating them.4 (CCSS: 5.OA.2)	Lesson 2	Write and Interpret Numerical Expressions— pp. 18–25

Standard: 1. Number Sense, Properties, and Operations

Prepared Graduates:

Are fluent with basic numerical and symbolic facts and algorithms, and are able to select and use appropriate (mental math, paper and pencil, and technology) methods based on an understanding of their efficiency, precision, and transparency

Concepts and skills students master:

3. Formulate, represent, and use algorithms with multi-digit whole numbers and decimals with flexibility, accuracy, and efficiency

FIFTH GRADE EVIDENCE OUTCOMES

Students can:

a. Use equivalent fractions as a strategy to add and subtract fractions. (CCSS: 5.NF)

i. Use benchmark fractions and number sense of fractions to estimate mentally and assess the reasonableness of answers. (CCSS: 5.NF.2)

 Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions with like denominators. (CCSS: 5.NF.1)

Solve word problems involving addition and subtraction of fractions referring to the same whole. (CCSS: 5.NF.2) SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 5

Lesson 16	Problem Solving: Add and Subtract Fractions—pp. 142–149
Lesson 15	Add and Subtract Fractions with Unlike Denominators—pp. 134–141
Lesson 16	Problem Solving: Add and Subtract Fractions—pp. 142–149

Standard: 1. Number Sense, Properties, and Operations **Prepared Graduates:** Understand the structure and properties of our number system. At their most basic level numbers are abstract symbols that represent real-world quantities **Concepts and skills students master:** 4. The concepts of multiplication and division can be applied to multiply and divide fractions (CCSS: 5.NF) SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 5 FIFTH GRADE EVIDENCE OUTCOMES Students can: a. Interpret a fraction as division of the numerator by the Lesson 17 Interpret Fractions as Division—pp. 150–157 denominator ($a/b = a \div b$). (CCSS: 5.NF.3) Interpret Fractions as Division—pp. 150–157 b. Solve word problems involving division of whole numbers Lesson 17 leading to answers in the form of fractions or mixed numbers. (CCSS: 5.NF.3) c. Interpret the product $(a/b) \times q$ as a parts of a partition of qLesson 18 Interpret Products of Fractions-pp. 158-165 into b equal parts; equivalently, as the result of a sequence of operations $a \times q \div b$. In general, $(a/b) \times (c/d) = ac/bd$. (CCSS: 5.NF.4a) d. Find the area of a rectangle with fractional side lengths by tiling it with unit squares of the appropriate unit fraction side lengths, and show that the area is the same as would be found by multiplying the side lengths. (CCSS: 5.NF.4b) Find Areas of Rectangles: Tile and Multiply i. Multiply fractional side lengths to find areas of Lesson 19 rectangles, and represent fraction products as pp. 166–173 rectangular areas. (CCSS: 5.NF.4b) e. Interpret multiplication as scaling (resizing). (CCSS: 5.NF.5) Compare the size of a product to the size of one Lesson 20 **Interpret Multiplication of Fractions as** i. factor on the basis of the size of the other factor, Scaling—pp. 174–181 without performing the indicated multiplication. (CCSS: 5.NF.5a) **Interpret Multiplication of Fractions as** Apply the principle of fraction equivalence a/b = (n + b)Lesson 20 ii. $(n \times b)$ to the effect of multiplying *a*/*b* by 1. Scaling—pp. 174–181 (CCSS: 5.NF.5b) f. Solve real world problems involving multiplication of Lesson 21 **Problem Solving: Multiply Fractions and** fractions and mixed numbers. (CCSS: 5.NF.6) Mixed Numbers—pp. 182–189 g. Interpret division of a unit fraction by a non-zero whole Lesson 22 Divide Unit Fractions by Whole Numbers number, and compute such quotients. (CCSS: 5.NF.7a) pp. 190-197 h. Interpret division of a whole number by a unit fraction, and Lesson 23 **Divide Whole Numbers by Unit Fractions** compute such quotients. (CCSS: 5.NF.7b) pp. 198-205

Sadlier Common Core Progress Mathematics, Grade 5, Aligned to the Colorado Academic Standards in Mathematics Grade Level Expectation: Fifth Grade

FIFTH GRADE EVIDENCE OUTCOMES

SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 5

i. Solve real world problems involving division of unit fractions by nonzero whole numbers and division of whole numbers by unit fractions. (CCSS: 5.NF.7c) Lesson 24 Problem Solving: Divide Unit Fractions and Whole Numbers—pp. 206–213

Standard: 2. Patterns, Functions, and Algebraic Structures

Prepared Graduates:

> Make sound predictions and generalizations based on patterns and relationships that arise from numbers, shapes, symbols, and data

Concepts and skills students master:

1. Number patterns are based on operations and relationships

FIFTH GRADE EVIDENCE OUTCOMES	SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 5	
Students can:		
a. Generate two numerical patterns using given rules. (CCSS: 5.OA.3)	Lesson 3	Analyze Numerical Patterns—pp. 26–33
b. Identify apparent relationships between corresponding terms. (CCSS: 5.OA.3)	Lesson 3	Analyze Numerical Patterns—pp. 26–33
c. Form ordered pairs consisting of corresponding terms from the two patterns, and graphs the ordered pairs on a coordinate plane. (CCSS: 5.OA.3)	Lesson 3	Analyze Numerical Patterns—pp. 26–33
d. Explain informally relationships between corresponding terms in the patterns. (CCSS: 5.OA.3)	Lesson 3	Analyze Numerical Patterns—pp. 26–33
e. Use patterns to solve problems including those involving saving and checking accounts (PFL)	Lesson 3	Analyze Numerical Patterns—pp. 26–33
f. Explain, extend, and use patterns and relationships in solving problems, including those involving saving and checking accounts such as understanding that spending more means saving less (PFL)	Lesson 3	Analyze Numerical Patterns—pp. 26–33

Standard: 3. Data Analysis, Statistics, and Probability **Prepared Graduates:** Solve problems and make decisions that depend on understanding, explaining, and quantifying the variability in data **Concepts and skills students master:** 1. Visual displays are used to interpret data FIFTH GRADE EVIDENCE OUTCOMES SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 5 Students can: a. Represent and interpret data. (CCSS: 5.MD) Make a line plot to display a data set of Lesson 27 Problem Solving: Use Line Plots—pp. 242–249 i. measurements in fractions of a unit (1/2, 1/4, 1/8). (CCSS: 5.MD.2) ii. Use operations on fractions for this grade to solve Lesson 27 Problem Solving: Use Line Plots—pp. 242–249 problems involving information presented in line plots.1 (CCSS: 5.MD.2) Standard: 4. Shape, Dimension, and Geometric Relationships **Prepared Graduates:** Understand quantity through estimation, precision, order of magnitude, and comparison. The reasonableness of answers relies on the ability to judge appropriateness, compare, estimate, and analyze error

Concepts and skills students master:

1. Properties of multiplication and addition provide the foundation for volume an attribute of solids.

FIFTH GRADE EVIDENCE OUTCOMES

Students can:

a. Model and justify the formula for volume of rectangular prisms. (CCSS: 5.MD.5b)

i. Model the volume of a right rectangular prism with whole-number side lengths by packing it with unit cubes. (CCSS: 5.MD.5b)

Show that the volume is the same as would be found by multiplying the edge lengths, equivalently by multiplying the height by the area of the base. (CCSS: 5.MD.5a)

Represent threefold whole-number products as volumes to represent the associative property of multiplication. (CCSS: 5.MD.5a) SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 5

Lesson 32	Problem Solving: Apply Volume Formulas for Prisms—pp. 282–289
Lesson 30	Find Volume: Relate Packing of Unit Cubes to Multiplying—pp. 266–273
Lesson 31	Find Volume: Use the Associate Property— pp. 274–281
Lesson 30	Find Volume: Relate Packing of Unit Cubes to Multiplying—pp. 266–273
Lesson 31	Find Volume: Use the Associate Property— pp. 274–281

Sadlier Common Core Progress Mathematics, Grade 5, Aligned to the Colorado Academic Standards in Mathematics **Grade Level Expectation: Fifth Grade**

\sum	

FIFTH GRADE EVIDENCE OUTCOMES		SADLIER COM	SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 5	
method	ume of rectangular prisms using a variety of s and use these techniques to solve real world and natical problems. (CCSS: 5.MD.5a)			
i.	Measure volumes by counting unit cubes, using cubic cm, cubic in, cubic ft, and improvised units. (CCSS: 5.MD.4)	Lesson 29	Measure Volume—pp. 258–265	
ii.	Apply the formulas $V = l \times w \times h$ and $V = b \times h$ for rectangular prisms to find volumes of right rectangular prisms with whole-number edge lengths. (CCSS: 5.MD.5b)	Lesson 32	Problem Solving: Apply Volume Formulas for Prisms—pp. 282–289	
iii.	Use the additive nature of volume to find volumes of solid figures composed of two non-overlapping right rectangular prisms by adding the volumes of the non-overlapping parts. (CCSS: 5.MD.5c)	Lesson 33	Problem Solving: Decompose Figures to Find Volume—pp. 290–297	

Standard: 4. Shape, Dimension, and Geometric Relationships

Prepared Graduates:

Make claims about relationships among numbers, shapes, symbols, and data and defend those claims by relying on \geq the properties that are the structure of mathematics

Concepts and skills students master:

2. Geometric figures can be described by their attributes and specific locations in the plane

FIFTH GRADE EVIDENCE OUTCOMES		SADLIER COM	SADLIER COMMON CORE PROGRESS MATHEMATICS, GRADE 5	
Students	can:			
	points on the coordinate plane to solve real-world thematical problems. (CCSS: 5.G)	Lesson 34	Understand Points on the Coordinate Plane —pp. 304–311	
		Lesson 35	Graph Points to Represent Problem Situations—pp. 312–319	
b. Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation. (CCSS: 5.G.2)		Lesson 35	Graph Points to Represent Problem Situations—pp. 312–319	
	two-dimensional figures into categories based on operties. (CCSS: 5.G)			
i.	Explain that attributes belonging to a category of two-dimensional figures also belong to all subcategories of that category. (CCSS: 5.G.3)	Lesson 36	Analyze Properties to Classify Two- Dimensional Figures—pp. 320–327	
ii.	Classify two-dimensional figures in a hierarchy based on properties. (CCSS: 5.G.4)	Lesson 36	Analyze Properties to Classify Two- Dimensional Figures—pp. 320–327
