ANSWERING MACHINE EMULATION

Note: your phone must have a VML monitor key programmed, if not call Granite Communications, Inc to have this key setup

TO TURN ON/OFF ANSWERING MACHINE EMULATION

- 1) Press **ICM**
- 2) Press **Feat**
- 3) Press **VM monitor**
- 4) Press **1** to de-active
 2 to set manual mode
 3 to set automatic mode (will play all messages out loud while they are being recorded)

If answering machine emulation is in manual mode you will hear a monitor alert tone when you are receiving a message and the VMMON key will be flashing red

Press flashing VMMON key

Note: the key will turn green as you listen to the messages to talk to the caller

Press the green VMMON key (must have bargin enabled)
