

# WOLF PAVING ASPHALT MADNESS

## THE BEST OFFENSE

1

Clean your asphalt surface regularly to remove debris and oil stains.

2

Inspect your asphalt surface regularly and monitor any surface changes.

3

Protect and prolong the life of asphalt pavement with a sealcoat application every 3-5 years.

5

Consider environmentally friendly porous asphalt for your next project for significant long-term cost savings.

4

Prevent water buildup to reduce the damage caused by the freeze/thaw cycle.

## THE BEST DEFENSE

2

Fill potholes with hot asphalt mix to repair the asphalt surface and to improve safety for vehicles and pedestrians.

3

If your asphalt needs repair, find a contractor that has asphalt mixers and expert technicians to ensure the proper mix of oil and aggregates.

4

Plan an annual budget to properly maintain your asphalt pavement.

1

When you see a crack reach  $\frac{1}{4}$  inch in thickness, be sure to have it filled to prevent spreading.

5

Hire a licensed, bonded and experienced asphalt contractor for your next paving job.
