

# Over 125 Years Supplying America's Fences

# Louis E. Page INC.

ESTABLISHED 1893

## ~ Celebrating Over 125 Years ~

Louis E. Page

Louis Eugene Page moved to Boston from Kenduskeag, Maine in the late 1800s. He found employment in a store serving the local horse trade with grain and hay. The store was located in Charlestown, MA where the Boston & Maine railroad had built a string of warehouses to serve the hay industry. Hay was an important and lucrative commodity for the railroad. At that time freight moved by horse-drawn conveyances and there was a high demand for hay.

Setting up an office and warehouse space on Rutherford Avenue, Louis entered the hay business. In the spring mud season, impassable roads prevented wagons from hauling hay to local rural sidings to be loaded into rail cars. Page had to have at least 200 carloads of hay in the Rutherford Ave. warehouses to meet demand. Hay was purchased from as far away as Quebec and Ontario. Canadian shippers bought from the local farmers and arranged shipment by rail. By 1910, Louis and two of his brothers were making their living from the hay business.

As gasoline powered vehicles began to displace horse drawn wagons, it became clear that the hay business would be one of declining value. Page's first move was to switch from selling types of hay suitable for horses to selling mixtures that would stimulate milk production in dairy cows. Dairy was a growing market. Small farms were being forced out of business and outlying dairy farms were growing in size and number of milk cows. With local acreage for producing their own hay limited and increasingly expensive, dairies had to turn to imported hay. In the late forties the dairy herds in areas such as Lexington, Malden and Revere were dependent on hay shipped by rail from many hundreds of miles away.

Page also offset the decline in hay demand by adding new products. As an established hay dealer, Louis E. Page, Inc. had many farm and feed store customers. The chicken broiler business was experiencing rapid growth. There was also a growing demand for litter and bedding materials for both the dairy and horse trade. To fill the need, Page acquired exclusive rights to distribute Planter Peanut shells in New England. Peanut shells were soon supplanted by a better product - sugar cane bagasse. Page was the exclusive distributor in New England for the only US sugar company producing bagasse. This product also proved to be an excellent horticulture mulch and some of the large New England nurseries bought it by the carload.

In the thirties Page added peat moss - both coarse grind designed for horse bedding and finer grind for horticultural purposes. Europe was the only source of supply at this time. Louis made several trips to Holland, Germany and Poland to line up sources. The 7-1/2 cubic foot compressed bales were wrapped in burlap and bound with wood slats and wire. After 1945 horticultural grades became the dominant interest and Page developed an exclusive arrangement with peat bogs in Canada.

The end of WW II brought great changes to Louis E. Page, Inc. In 1950 Louis moved the office to West Concord, MA. Demand for hay in urban areas had dried up. Most of the hay moved by rail car. On a Monday morning it was not unusual for Page to have 50 carloads on track at one of three New England junction points. Once a carload was sold, it would be moved to a siding close to the customer for unloading. Over time, independent truckers began hauling hay directly from the growers to the farms, eliminating the need for the middleman. It was the same situation with peat moss.

Feed and farm stores were still the most important segment of the company's customer base. New products needed to be added. The first additions were Belgian barbed wire and Mexican baler twine. Selling these new products required warehousing - a big change from the bulk commodity business. Early warehousing was done at public warehouses near the Boston docks.

Customer response encouraged Page to further expand their lines. In a few years Page was issuing 2,500 catalogs annually, establishing Louis E. Page, Inc. as a New England distributor of wire mesh, fencing and related products for New England dealers. The 24 page catalog listed a wide variety of products from Belgian, Dutch, German, Austrian and leading US mills. Louis E. Page, Inc. developed a close relationship with the Belgian firm Bekaert, the largest producer of wire products in the world and was selected as their exclusive distributor in New England.

Louis E. Page, Inc. outgrew its early dependence on the farm store trade. The annual catalog was soon going to fence companies, hardware stores, building supply dealers, lumber yards and other operations interested in wire mesh and related products. Due to the product spread of supplying mills, Page at one time stocked 86 different specifications of hexagonal mesh netting from five different mills. In 1967 Page moved its operations to Littleton, MA. Increased office space and substantial warehouse space enabled Page to handle the increased volume of business. A satellite warehouse was opened at J & F Farms in Derry, NH to service customers in Maine, New Hampshire and Vermont.

Louis E. Page, Inc. has been responsive to the rapidly changing dynamics in the marketplace. With the steady decline of farming in New England and the appearance of big box retailers Page has become more specialized. Heavier meshes and fencing not readily available from hardware wholesalers have become a large portion of the business - wire meshes for specific purposes: beagle training pens, game bird pens, duck farms, wildlife containment, etc. Our numerous contacts over the years with many different wire mills has been a huge advantage. The customer base has expanded not only across all 50 states and beyond but also into new areas: municipalities, industrial manufacturing, wildlife management areas, etc.

As Louis E. Page, Inc. celebrates its 120 anniversary, still family owned and operated, you are invited to celebrate with us!

John, Ralph, Louis, Alan Page  
W. Concord, MA

# GAW - Galvanized After Weld Wire Mesh

## Description -

- Galvanizing covers entire mesh including welded areas
- Mesh is drawn through bath of molten zinc after welding
- **Baby Saver** - 1/2"x1" bottom 4", 1"x2" top 14" - for baby rabbit cages
- GAW wire meshes are completely sealed, protected from rust and corrosion.

## Benefits -

- Extra long lifetime
- Strong and extremely durable
- Lasts years longer than GBW, even in harshest conditions
- Higher initial cost is offset by lower frequency of repair and replacement

## Uses -

- Greenhouse benches
- Bird cages and feeders
- Industrial machine guards
- Nuisance animal exclusion
- Animal cages & enclosures
- Baby rabbit cages (Baby Saver)
- Railing safety mesh in-fill panels
- Turtle and tortoise exclusion fence
- Long lasting home and garden fence
- Ground wire for bird and animal enclosures
- Ideal material for areas where rust and corrosion are factors

# VC - Vinyl Coated Welded Wire Mesh

## Description -

- Galvanized welded wire mesh underneath
- Black most common, some items available in Green
- Coating gives double protection from rust and corrosion
- Thick PVC coating is tightly bonded to wire - will not peel
- UV inhibitors in the vinyl retard degradation from sunlight
- Coating is flexible and durable - will not crack when the wire is bent

## Benefits -

- Extremely strong and durable
- Attractive - non-intrusive to landscape
- Easy to clean when used in animal cages
- Weather proof - rust and corrosion resistant
- Toughest, longest lasting wire mesh available
- Black coating is unobtrusive - blends with the background
- PVC maintains its qualities in extremes of hot and cold temperatures

## Uses -

- Kennel flooring
- Screens and partitions
- Swimming pool fence
- Yard and garden fence
- People control in public areas
- Barriers and cages for animals
- Wood post and rail fence backer
- Attractive home and garden fence
- Panel inserts for deck and stair railings

# SS - Stainless Steel Welded Wire Mesh

## Description -

- Welded wire meshes of stainless steel
- No additional finish needed for protection
- Available in wide variety of gauge and mesh sizes
- Other specifications not listed here may be available

## Benefits -

- Strong and durable - extra long lifetime
- Ideal for hard-to-access areas exposed to rust and corrosion
- Lasts years longer than GBW products in harshest conditions
- Higher initial cost offset by lower frequency of repair/replacement

## Uses -

- Greenhouse benches
- Bird cages and feeders
- Industrial machine guards
- Nuisance animal exclusion
- Animal cages and enclosures
- Decorative architectural panels
- Railing safety mesh in-fill panels
- Fencing for salt water environment
- Long lasting home and garden fence
- Bird exclusion mesh in commercial structures

## SS Hardware Cloth

### Description -

- Hardware cloth welded from stainless steel
- Durable protection from rust and corrosion

### Benefits -

- Extended lifetime
- Ideal for seacoast locations
- Reduces frequency and cost of repair and maintenance
- Longer lasting - superior protection with both vinyl and galvanizing

### Uses -

- Compost bins
- Window guards
- Tree trunk protection
- Nuisance wildlife control
- Underground gopher barrier

### 19 gauge - 1/2"x1/2" (2 mesh)

# GBW - Galvanized Before Weld Wire Mesh

## Description -

- GBW wire mesh has a limited lifetime
- Pre-galvanized wire is welded into mesh
- Protective galvanizing burns off at weld points where wires intersect
- **Baby Saver** - 1/2"x1" bottom 4", 1"x2" top 14" - for baby rabbit cages

## Benefits -

- Economical
- Choice of gauges and mesh sizes
- Ideal for many different applications
- Ideal choice when rust and corrosion are not a concern

## Uses -

- Temporary fence
- Window protection
- Wrapping stone pallets
- Tree and shrub protection
- Industrial machine guards
- Nuisance animal exclusion
- Baby rabbit cages (Baby Saver)
- Security mesh for storage areas
- Turtle and tortoise exclusion fence
- Inexpensive home and garden fence
- Low cost animal cages and enclosures

# Hardware Cloth

## GAW - Galvanized After Weld

### Description -

- Small mesh openings
- Galvanizing stiffens the mesh
- Light weight, small gauge meshes
- Welded mesh has uniformly spaced wires
- Zinc coating applied after the mesh has been welded
- Thick layer of zinc protects against rust and corrosion

### Benefits -

- Easy to bend and shape
- Light weight and flexible
- Long lifetime from zinc protection

### Uses -

- Bee keeping
- Gutter guard
- Groundhog barrier
- Small animal cages
- Plaster and stucco lath
- Nuisance wildlife control
- Underground gopher barrier

### 19 gauge - 1/2"x1/2" (2 mesh) - GAW

24"x100'	42 lbs.	HC224
36"x100'	63	HC236
48"x100'	84	HC248
60"x100'	105	HC260
72"x100'	126	HC272

### 23 gauge - 1/4"x1/4" (4 mesh) - GAW

24"x100'	46 lbs.	HC424
36"x100'	55	HC436
48"x100'	73	HC448

## VC - Vinyl Coated

### Description -

- PVC is UV stabilized for long life
- Galvanized mesh coated with Black PVC
- Double protection from rust and corrosion
- Rugged coating is tightly bonded to underlying GAW mesh

### Benefits -

- Attractive - unobtrusive Black coating blends with background
- Longer lasting - superior protection with both vinyl and galvanizing

### Uses -

- Soffit screens
- Compost bins
- Window guards
- Tree trunk protection
- Nuisance wildlife control
- Underground gopher barrier

### 19 gauge - 1/2"x1/2" (2 mesh) - VC

## Ramada

### Description -

- 48"x100' rolls made by Tenax
- Heavy, rigid, quadrangular .47"x.47" mesh
- UV stabilized high density Black polyethylene

### Benefits -

- Reusable and recyclable
- Easy to cut and wash down
- Will not scratch, rust, mildew or rot

### Uses -

- Aquaculture netting
- Cages, traps and pens
- Light birdhouse partitions

**TENAX**

### Ramada - Black polyethylene

# Swimming Pool Fence - VC, GAW & SS Welded Mesh

## Description -

- Galvanized core wire
- Available in Black or Green vinyl coated
- UV inhibitors in PVC retard degradation from sunlight
- Vinyl coating is flexible - will not crack when wire is bent
- Coating gives mesh double protection from rust and corrosion
- Thick layer of tightly bonded black or green PVC will not peel
- Also available in long life Galvanized After Weld and Stainless Steel

## Benefits -

- Attractive
- Long lasting
- Rust resistant
- Extremely strong and durable
- Non-climbable mesh keeps children out of pool area
- Black coating is unobtrusive - blends with background
- Meets BOCA Code requirements for swimming pool fence
- PVC maintains its qualities in hot & cold temperature extremes

## Uses -

- Swimming pool fence
- Play yards for children
- Garden perimeter fence
- Attractive enclosure for dogs
- Wood post and rail fence backer

## Heavy-Duty Yard Gard - USA

### Description -

- Galvanized wire under the coating
- Black and Green PVC tightly bonded to wire
- Coating is flexible - will not crack when the wire is bent
- UV inhibitors in the vinyl retard degradation from sunlight
- Coating over galvanized mesh = double protection from rust, corrosion

### Benefits -

- Strong, durable and long lasting
- Weather proof - rust and corrosion resistant
- PVC maintains its qualities in extremes of hot and cold temperatures
- Attractive - Black coating is unobtrusive - blends with the background

### Uses -

- Fencing for dog runs
- Boundary delineations
- People control in public areas
- Barriers and cages for animals
- Attractive home and garden fence
- Backing for wood post and rail fence
- Panel inserts for deck and stair railings

# VC Welded Wire Mesh

## 2"x4" - 12-1/2, 11, 10-1/2 gauge - Heavier Yard Gard

### Description -

- Finish will not rot or rust
- No rough edges or sharp points
- Three gauges: 12-1/2, 11 and 10-1/2
- Coating is flexible - will not crack when the wire is bent
- UV inhibitors in the vinyl retard degradation from sunlight
- Extra strong and heavy weight for more demanding applications
- Black PVC coating tightly bonded to galvanized wire - will not peel
- Coating over galvanized mesh gives double protection from rust, corrosion

### Benefits -

- Reduces need for repair and replacement
- Black coating blends with the background
- Weather proof - rust and corrosion resistant
- Heavy gauge wires give these robust fences a long life
- PVC maintains its qualities in extremes of hot and cold temperatures

### Uses -

- Kennel fence for larger dogs
- Wood post and rail fence backer
- Heavy duty yard and garden fence
- Strong barriers and cages for animals
- Ideal fence for public areas and parks
- Panel inserts for deck and stair railings

## 3"x2" - 16 gauge - Regular Yard Gard

### Description -

- Imported
- Flexible coating
- Black or green available
- Finish will not rust or rot
- No rough edges or sharp points
- Galvanized Before Weld (GBW) wire mesh under vinyl
- UV inhibitors in the vinyl retard degradation from sunlight
- Coating over galvanized mesh gives double protection from rust and corrosion

### Benefits -

- Light weight and durable
- Attractive - non-intrusive to landscape
- Black coating blends with the background
- Weather proof - rust and corrosion resistant
- Economical - less expensive than 2"x4" meshes
- PVC maintains its qualities in extremes of hot and cold temperatures

### Uses -

- Play area fence
- Yard and garden fence
- Attractive around the house
- Kennel fence for smaller dogs
- Wood post and rail fence backer

# Hex Netting - 20 gauge

## 1" mesh - Black Vinyl Coated

### Description -

- Vinyl is stable under wide range of temperatures
- UV inhibitors protect against sunlight degradation
- PVC is extremely resistant to cracking and weathering
- 1" **GBW** hex mesh woven from 20 gauge galvanized wire
- Protective zinc coating under PVC resists rust and corrosion
- Double protection - thick coating of tightly bonded black PVC

### Benefits -

- Choice of different heights
- Vinyl coating gives long life
- Economical light weight mesh
- Excellent product for deer fence
- Ideal for a variety of applications at home or farm
- Black color blends into background - virtually invisible

### Uses -

- Rabbit fence
- Chicken coops
- Game bird flight pens
- Deer fence - 84" and 90"
- Small mesh garden fence
- Tree and shrub protection
- Nuisance animal exclusion
- Ground wire to prevent digging animals

### 20 gauge - 1" hex VC Black

90"x100'	85	HXVC190B

## 1" and 2" mesh - GBW - Galvanized Before

### Description -

- Made from 20 gauge wire
- Reverse twist construction
- Protective zinc coating resists rust and corrosion
- **GBW** 20 gauge wire woven in 1" and 2" hexagonal meshes

### Benefits -

- Economical light weight mesh
- Galvanized for rust protection
- Choice of mesh sizes and heights
- Ideal for a variety of applications
- Good choice when rust is not a concern

### Uses -

- Craft projects
- Chicken coops
- Insulation retainer
- Plaster reinforcement
- Stone pallet wrapping
- Tree and shrub protection
- Inexpensive garden fence
- Nuisance animal exclusion

### 20 gauge - 1" hex GBW

# Apron Fence - 1-1/2" hex mesh

## VC - Black Vinyl Coated

### Description -

- Custom PVC coated in USA
- Red Brand Apron Fence **Made in USA**
- Extra heavy 17 gauge **GBW** wire woven into 1-1/2" hex netting
- This is the **only** premium quality vinyl coated Apron Fence available that is entirely Made in USA

### Benefits -

- Vinyl is stable under wide range of temperatures
- Highest quality Vinyl Coated Apron Fence available
- Rugged tightly bonded Black PVC coating is UV stabilized
- Coating adds years of life to fence - a greater value than GBW wire
- Black color is more attractive - less visible, blends with background

### Uses -

- Garden fence
- Game bird pens
- Tennis court fence
- Beagle training pen fence

**Made in USA**  
**17 gauge - 1-1/2" hex Black VC**  
60"x150'    159 lbs.    48" high with 12" apron    HXVCBG60B

# Stone Wrap Netting - 2" hex mesh

### Description -

- G. F. Wright product made by Deacero
- 20 gauge galvanized wire woven into 2" GBW hex netting
- Attention to quality control assures perfect hexagonal shape
- Extra twist at intersection makes this mesh stronger than others

### Benefits -

- Safer - mesh less likely to open and/or break
- Stronger, longer twists in the mesh make netting stronger
- Specifically designed to be used for wrapping pallets of stone
- More cost effective - reduction in additional material labor per pallet

### Uses -

- Wrapping pallets of stone securely for shipment and handling

**20 gauge - 2" hex GBW**  
36"x150'    22 lbs.    HXGB215036STONE

# Steel Fence Posts

## U posts - 13 gauge Green

### Description -

- Durable Green PVC coating
- Medium duty 13 gauge steel
- Anchor plates measure 2-3/4"x4-1/2"
- Anchor plates securely riveted to post
- Punched 1/4" holes are 6" apart entire length of post
- Self-fastening lugs spaced 6" apart entire length of post
- Bottom lugs face downwards to keep fence from riding up

### Benefits -

- Easy to attach fence to post
- Useful for lighter weight fencing
- Lugs hold fence securely against post
- Easy to drive into ground - no digging required
- Reflectors and signs can be mounted through holes
- PVC coating provides rust and corrosion protection

### Uses -

- Temporary fence
- Boundary marker
- Snow & safety fence
- Tree and shrub support
- Heavy duty driveway markers
- Sign posts - small signs and reflectors

### U posts 13 gauge - Green pvc coated

5'	5 lbs.	PP135
6'	6	PP136

## T posts - Green, Black & Galvanized

### Description -

- Anchor plates cold forged to post
- Heavy anchor plate measures 3-1/2"x5-1/2"
- Rolled from high carbon high tensile rail steel
- Studs are placed 2-1/8" apart entire length of post
- **New for 2014 - Black** enamel finish 6' 1.25 lb/ft posts
- Fence fabric attached securely to post by pre-formed metal clips
- Available in **Black** or **Green** enamel and hot dipped **Galvanized**

### Benefits -

- T design resists bending
- Heavier and stronger than U posts
- Swaged anchor plates give posts stability
- Rail steel naturally resistant to weathering
- Easy to drive into ground - no holes to dig
- Strong holding power for any type of fence
- Galvanized posts have superior rust resistance
- Galvanized posts meet Federal Highway specs
- Studs prevent fence fabric from riding up or down the post

### Uses -

- Highway fence
- Boundary marker
- Snow fence support
- Farm and field fence
- Tree and shrub support
- Deer and wildlife fence
- Sand fence for dune maintenance
- Landfill and construction site fence

### Made in USA Studded T posts

# Horse Fence - Woven Wire Mesh

## 2"x4" - 12-1/2 gauge

### Description -

- Knots resist rust - will not hold water
- Bekaert and Stay-Tuff products - **Made in USA**
- Woven mesh gives fence flexibility - conforms to uneven terrain
- Galvanized - heavier gauge top and bottom wires add strength to fence
- Stiff knots securely hold horizontal and one piece vertical wires together
- **Galvanized** (Class 3) - Stay-Tuff
  - ~ High tensile **12-1/2 gauge** wires throughout
- **Zinc Aluminum (ZA)** - Bekaert
  - ~ High strength **12-1/2 gauge** horizontal, **14 gauge** vertical wires
  - ~ 95% zinc, 5% aluminum - lasts three times longer than Class 1
- **ZA + Black paint** - Bekaert
  - ~ **12-1/2 gauge** horizontal and vertical wires
  - ~ UV stabilized Black paint over ZA - lasts longer than Class 3
- Refer to back cover (page 28) for details on these three types of finishes

### Benefits -

- Low maintenance
- Heavy-duty multi-purpose fence
- Ideal for many different applications
- Black is less visible - blends into background
- Long lasting - no welded spots to rust quickly
- Smooth knots will not injure animals or people

### Uses -

- Garden fence
- Horse paddock fence
- Parks and public areas
- Emu and ostrich enclosures
- Dog kennels and containment

### Made in USA

#### 12-1/2 gauge - Class 3 galvanized

48"x100'	116 lbs.	KS1213483
48"x200'	231	KS1213483200

#### 12-1/2 gauge - ZA + Black paint

48"x100'	122 lbs.	KS121348B
48"x200'	244	KS121348B200
60"x100'	151	KS121660B

- **ZA** - 95% Zinc, 5% Aluminum finish
- Wire finish information see **page 28**

# Woven Wire Meshes

## Sheep & Goat Fence

### Description -

- **Made in USA**
- 4"x4" mesh throughout
- Deep crimps in wire facilitate tensioning
- 12-1/2 gauge high-tensile wires throughout
- Class 3 galvanizing for long life and durability
- Smooth knots will not injure animals or people
- One piece vertical and horizontal wires joined by Stiff Stay knots

### Made in USA

**12-1/2 gauge HT - Class 3 galvanized**  
48"x330' 251 lbs. FF13484330-3

### Benefits -

- Extremely strong and durable
- Long lasting and rust resistant
- Designed as a strong confinement fence for sheep and goats
- Woven construction allows fence to conform to uneven terrain
- Small mesh openings discourage animals from putting heads through

### Uses -

- Property line fence
- Perimeter fence for gardens
- Protective fence for sheep, goats and other animals

## Field Fence

### Description -

- Fencing available for any type of animal
- Different heights ranging from 48" to 120"
- Graduated openings - smaller at bottom, larger at top
- Woven fences **Made in USA** - strong and long lasting
- Flexible woven joints secure vertical stay wires and horizontal line wires

### Benefits -

- Long rolls = fewer splices
- Very strong and durable wire mesh
- Horizontal wire are crimped to allow for expansion
- Woven construction allows easier installation over uneven ground
- Longer lifetime reduces frequency, high cost of repair and replacement

### Uses -

- Pasture fence
- Right of way fence
- Livestock containment
- Property/boundary delineation

### Made in USA

**12-1/2/14-1/2 gauge - High Tensile ZA (5% ZN, 95% Al)**  
1047-6 47"x330' 142 lbs. FFHT10476ZA

- For Deer & Wildlife specifications, see **page 18**

## Barbed & Barbless Wire

### Description -

- Special order items
- Two or four point barbs
- 80 rod reels (1,320 feet)
- 12-1/2 gauge Class 1
- 12-1/2 gauge barbless cable
- 15-1/2 gauge Hi-tensile Class 3

barbed

barbless

# Deer & Wildlife Fence - Woven High Tensile

## Description -

- Made in USA
- Knots will not unravel, break or slide
- Shorter rolls are suitable for farm animals
- One piece vertical stay wires give greater strength
- Stiff knots securely hold horizontal line and vertical stay wires together
- Strong deer/game fence woven from 12-1/2 or 14 gauge **high tensile** wire
- Fence will not sag or stretch under snow load or extreme temperature changes
- Crimps in horizontal wires allow fence to conform to terrain and absorb impact
- Three finishes, depending on style:
  - ~ **Class 3** - heavy galvanizing makes fence extremely durable and long lasting
  - ~ **Zinc Aluminum (ZA)** - 95% zinc, 5% aluminum - lasts three times longer than Class 1
  - ~ **ZA + Black paint** - UV stabilized Black paint over ZA - lasts longer than Class 3
- Refer to back cover (page 28) for details on these three types of finishes

2096 style

## Benefits -

- Choice of different mesh opening sizes
- Low maintenance cost after installation
- Class 3 and other finishes mean extra long life
- Fewer line posts needed with high tensile fences
- Wide variety of heights for different farm animals and wildlife

## Uses -

- Horse fence
- Cattle fence
- Sheep and goat fence
- Property boundary fence
- Orchard and vineyard fence
- Deer, wildlife and game fence

### 12-1/2 gauge - High tensile Class 3 galvanized

2096-6	96"x330'	396	FFDR2096B

- **ZA** - 95% Zinc, 5% Aluminum finish
- Wire finish information see **page 28**

# Deer Barrier Fence

## 1" hex - Black Vinyl Coated

### Description -

- 1" hexagonal mesh openings
- Thick coating of Black UV stabilized PVC
- Two roll sizes: **84"x150'** and **90"x100'**
- 20 gauge Galvanized Before Weave (GBW) mesh under vinyl coating

### Benefits -

- Extra tall **84"** (7') and **90"** (7-1/2')
- No need to piece shorter rolls together
- Lower labor costs, shorter installation time
- Flexible mesh is designed to give upon impact
- Material is highly resistant to rust and corrosion
- Unobtrusive barrier - Black color blends with background
- Weather proof - long lifetime due to zinc and PVC protection

### Uses -

- Protect individual trees and shrubs
- Ideal to use in populated suburban areas
- Barrier fence to keep deer away from gardens and plantings

### 20 gauge - 1" Black PVC coated hex

84"x150'	126 lbs.	HXVC184B
90"x100'	85	HXVC190B

## Black Polypropylene

### Description -

- Three types available:
  - ~ **C-Flex** - tensile strength: 411 lbs./ft.
  - ~ **C-Flex P** - tensile strength: 685 lbs./ft.
  - ~ **C-Flex HD** - tensile strength: 890 lbs./ft.
- UV stabilized Black polypropylene for long life
- 1.77"x1.97" extruded mesh in a variety of roll sizes

### C-Flex - 1.77"x1.97" mesh

60"x100'	17 lbs.	CFDEER5100
60"x200'	28	CFDEER5200
90"x100'	23	CFDEER75100
90"x330'	65	CFDEER75330

### C-Flex P - 1.77"x1.97" mesh

90"x164'	37 lbs.	CFDEER
----------	---------	--------

### C-Flex HD - 1.77"x1.97" mesh

60"x100'	18 lbs.	CFDEERHD5100
96"x100'	34	CFDEERHD8100
96"x165'	50	CFDEERHD8165

### Benefits -

- Extra tall 90" rolls
- Light weight, strong and easy to work with

### Uses -

- Protect individual trees and shrubs
- Ideal to use in populated suburban areas
- Barrier fence to keep deer away from gardens and plantings

## Black Vinyl Coated Welded Wire

### Description -

- 2"x4" welded wire mesh
- 14 gauge galvanized wire
- Coating is UV stabilized for long life
- More rugged than extruded plastic meshes
- Black color blends with background - virtually invisible
- Vinyl coating over galvanized wire gives extra protection

### Benefits -

- Extra tall 90" rolls
- Strong and easy to work with

### Uses -

- Protect individual trees and shrubs
- Ideal to use in populated suburban areas
- Barrier fence to keep deer away from gardens and plantings

### 14 gauge - 2"x4" Black PVC coated

96"x100'	120 lbs.	LYGHVBL9610ECON
----------	----------	-----------------

# Snow & Sand Fence - Tenax

## Nordic Plus II

### Description -

- Black and Orange available
- Heaviest snow fence made by Tenax
- Oval apertures approximately 3.5"x0.9"
- Extra heavy duty UV treated high density polyethylene

### Benefits -

- Helps slow down erosion
- Often used in DOT projects
- Supports sand dune maintenance programs
- Makes snow removal more efficient and less costly
- Promotes retention of sand reserves created by beach reclamation and restoration

### Nordic Plus II snow fence - Black

48"x100' 43 lbs. SFNORDIC48100B

### Nordic Plus II snow fence - Orange

48"x100' 43 lbs. SFNORDIC48100O

## Alpi

### Description -

- High tensile
- Orange available
- Oval apertures approximately 3.15"x1.77"
- UV treated high density, high tensile polyethylene

### Alpi snow fence - Orange

48"x50' 15 lbs. SFALPI48050O

48"x100' 30 SFALPI48100O

## Sno-Guard

### Description -

- Most economical snow fence
- Orange, green and yellow available
- Oval apertures approximately 1.8"x1.8"
- UV treated high density, high tensile polyethylene

### Sno-Guard - Orange

48"x50' 10 lbs. SFSG48050O

48"x100' 20 SFSG48100O

### Sno-Guard - Green

48"x50' 10 lbs. SFSG48050G

### Sno-Guard - Yellow

48"x100' 20 lbs. SFSG48100Y

## Saf-T-Sno

### Description -

- Mid-grade snow fence
- Orange and black available
- Oval apertures approximately 3.8"x1.1"
- UV treated high density, high tensile polyethylene

### Saf-T-Sno - Orange

48"x50' 12 lbs. SFSAFTSNO48050O

48"x100' 24 SFSAFTSNO48100O

### Saf-T-Sno - Black

48"x50' 12 lbs. SFSAFTSNO48050B

48"x100' 24 SFSAFTSNO48100B

### Benefits -

- Rolls are compact, light weight and easy to store and reuse
- Year round use - safety fence in warm weather, snow fence in cold weather

### Uses -

- Crowd control
- Temporary fence
- Snowdrift control
- Control of beach erosion
- Tree and shrub protection
- Control of drifting sand dunes
- Landfill and construction site fence

# Plastic Safety Fence - Tenax

## Safety Fence - Sentry Heavy Duty

### Description -

- Smooth top and bottom
- **2.36"x2.36"** diamond mesh openings
- UV stabilized high density polyethylene
- Heaviest duty safety fence provides strongest barrier

### Sentry Heavy Duty - Orange

48"x50'	17 lbs.	PLSAFSENTRYHD480500
48"x100'	34	PLSAFSENTRYHD481000

### Sentry Heavy Duty - Black

48"x50'	17 lbs.	PLSAFSENTRYHD48050B
---------	---------	---------------------

### Sentry Heavy Duty - Green

48"x50'	17 lbs.	PLSAFSENTRYHD48050G
---------	---------	---------------------

## Safety Fence - Sentry Secura

### Description -

- Smooth top and bottom
- **1.46"x1.46"** diamond mesh openings
- UV stabilized high density polyethylene
- Medium duty safety fence provides a strong barrier

### Sentry Secura - Orange

48"x50'	15 lbs.	PLSAFSECURA480500
48"x100'	29	PLSAFSECURA481000
60"x50'	18	PLSAFSECURA600500
72"x50'	22	PLSAFSECURA720500

### Sentry Secura - Green

48"x50'	15 lbs.	PLSAFSECURA48050G
---------	---------	-------------------

## Safety Fence - Sentry

### Description -

- Smooth top and bottom
- **1.46"x1.46"** diamond mesh openings
- UV stabilized high density polyethylene
- Economical safety fence provides a good barrier

### Sentry- Orange

48"x50'	12 lbs.	PLSAFSENTRY480500
48"x100'	23	PLSAFSENTRY481000

## Safety Fence - Diamex

### Description -

- **1.80"x1.46"** diamond mesh openings
- UV stabilized high density polyethylene
- Mid-economy safety fence provides a rigid barrier

### Diamex - Orange

48"x50'	12 lbs.	PLSAFDIAMEX480500
---------	---------	-------------------

### Diamex - Green

48"x50'	12 lbs.	PLSAFDIAMEX48050G
---------	---------	-------------------

## Safety Fence - Beacon Plus

### Description -

- **3.5"x2"** oval mesh openings
- UV stabilized high density polyethylene
- Safety fence for construction sites and property lines

### Beacon Plus - Orange

48"x50'	6.5 lbs.	PLSAFBEACON480500
48"x100'	13	PLSAFBEACON481000

### Beacon Plus - Green

48"x50'	6.5 lbs.	PLSAFBEACON48050G
48"x100'	13	PLSAFBEACON48100G

## Safety Fence - Kryptonight

### Description -

- **1.75"x1.75"** oval openings
- Fluorescent yellow UV stabilized high density polyethylene
- Affordable safety fence for higher visibility construction barrier

### Kryptonight - Fluorescent Yellow

48"x50'	6.5 lbs.	PLSAFKRYPT48050Y
48"x100'	13	PLSAFKRYPT48100Y

## Safety Fence - Guardian

### Description -

- **1.75"x1.75"** oval openings
- UV stabilized high density polyethylene
- Economical lightest weight for construction or crowd control

### Guardian - Orange

48"x50'	4.5 lbs.	PLSAFGUARD480500
48"x100'	8.5	PLSAFGUARD481000
96"x500'	105	PLSAFGUARD965000

### Guardian - Green

48"x100'	8.5 lbs.	PLSAFGUARD48100G
----------	----------	------------------

### Guardian - Yellow

48"x100'	8.5 lbs.	PLSAFGUARD48100Y
----------	----------	------------------

### Benefits -

- Reusable and recyclable
- Light weight - easy to handle
- Easy to put up, take down and store
- Will not scratch, rust, mildew or rot

**TENAX**

# Tenax Netting

## Cintoflex - Multipurpose Netting

### Description -

- UV stabilized Black for longer life
- Resistant to mildew and will not rust
- Withstands extremes of hot and cold weather
- Unaffected by acids generated on poultry farms
- Non-toxic, flexible and high density polyethylene
- Possesses strength normally associated with wire netting
- Recyclable polyethylene extruded poultry netting by Tenax
- Netting can be fastened together with safety ties or lacing cord

### Benefits -

- Cost-efficient
- Fewer support poles are required
- Large sized pieces save time and labor
- Flexibility prevents injury to your birds
- Light weight - easy to handle and install
- No need to join pieces to cover a large area

### Uses -

- Crop protection netting
- Light netting for bird pens
- Barrier fencing for bird and deer control

### Cintoflex E - .51" x .59" mesh

**breaking load: 355 lbs./ft.**

4'x330'	23 lbs.	CF12344330
6-1/2'x330'	38	CF123465330

7-1/2'x330'	49	CF2275330
10'x330'	57	CF2210330
15'x330'	80	CF2215330

- Tenax Deer Fence see page 19

## Hortonova - Crop Support Netting

### Description -

- Rot and rust proof
- Resistant to UV rays and chemical agents
- White recyclable extruded polypropylene mesh
- Climbing plants attach themselves easily to mesh
- Ideal for vertical and horizontal growing techniques

### Benefits -

- Inexpensive
- Easier to cultivate
- More efficient use of space
- Large mesh allows easier harvest
- Higher crop yields per square foot
- Large sized pieces save time and labor
- Light weight - easy to handle and install
- Contact with ground is reduced - better drainage
- Trellising provides plants with greater exposure to sun and air

### Hortonova FA - 6" x 6" mesh

7FA	36"x328'	3 lbs.	CFHORT6636328
7FA	36"x3,280'	22	CFHORT66363280

13FG	79"x250'	3	CFHORT6779250
13FG	79"x328'	4	CFHORT6779328
13FG	79"x3,280'	42	CFHORT67793280

### Uses -

- Crop support - vertical and horizontal

# Netting - Woven & Knotted

## Top Netting

### Description -

- Will not rust
- Resistant to mildew
- UV stabilized for longer life
- Woven multiple strands of Black polypropylene
- Available in different tensile strengths and sizes
  - ~ **Top Net 1** break strength: 35 pounds
  - ~ **Top Net 2** medium break strength: 65 pounds
  - ~ **Top Net 2** heavy break strength: 75 pounds
- Netting can be fastened together with hog rings, safety ties or lacing cord

### Benefits -

- Easy to work with and install
- Large sized pieces save time and labor
- Flexibility prevents injury to your birds
- No need to join pieces to cover a large area

### Uses -

- Crop protection netting
- Netting for game bird flight pens
- Use larger openings and heavier netting when snow is a factor

## Aviary Netting

### Description -

- Small opening mesh
- Will not rust - resistant to mildew
- Black UV stabilized polypropylene for longer life

### Benefits -

- Ideal for small birds
- Square mesh is pre-stretched
- Easy to work with and install
- Flexibility prevents injury to your birds

### Uses -

- Netting for small bird aviaries

## Bird Netting - Ornex & S 31

### Description -

- Ornex SM and Ornex LM from Tenax
  - ~ crop protection for fruits and vegetables, pond covers
- S 31 from Tenax
  - ~ protection for vineyards and orchards
  - ~ strongest bird control netting available

### Benefits -

- Will not rust - resistant to mildew
- UV stabilized polypropylene for longer life

### Ornex Bird Netting

# Fence Staples & Fasteners

## Fence Staples

### Description -

- Staples are barbed for extra holding power
- 8 gauge wire coated with ZA (Zinc-Aluminum) finish

### Benefits -

- 8 gauge provides good holding power in wood posts
- ZA provides rust protection superior to Class 1 galvanized

### Uses -

- Fasten wire to wood posts

### 8 gauge

1-1/4"	80 per lb.	8 lbs.	STZA125-08
1-1/4"	80 per lb.	52	STZA125-50
1-3/4"	60 per lb.	8	STZA175-08
1-3/4"	60 per lb.	52	STZA175-50
2"	50 per lb.	8	STZA2-08

## Hog Ring Pliers & Rings

### Description -

- **Auto-feed pliers**
  - ~ speedy one-hand operation
  - ~ strips of pliers load into spring-loaded magazine
  - ~ individual rings are automatically fed to the jaws

### P-7 - auto feed

Rings - sharp  
1/2" open  
1/4" closed

### Ringer-9/16 - auto feed

Rings, 15 ga. - sharp  
1/2" open  
3/16" closed

### Manual feed

Rings - blunt  
14 ga.

### P-7 pliers

1 lb. HRPLBOS

### SR-8 rings - galvanized

2,500 3 lbs. HRSR8

### SR-8 rings - stainless

2,500 3 lbs. HRSR8S

- 25 rings/clip

### Ringer-9/16 pliers

2 lbs. HRPLBOS916

### 1550 rings - galvanized

2,500 4 lbs. HRSR1550

### 1550 rings - stainless

2,500 4 lbs. HRSR1550SS

- 25 rings/clip

### Manual pliers

1 lb. HRPLRIV

### Loose rings - galvanized

3/8" 500/lb. 5 lb. HR38G-5 25 lbs. HR38G-25

1/2" 475/lb. 5 HR12G-5 25 HR12G-25

3/4" 450/lb. 5 HR34G-5 25 HR34G-25

### Loose rings - stainless

3/4" 450/lb. 5 HR34S-5 25 HR34S-25

## Pneumatic Hog Ring Pliers & Rings

### Description -

- Automatic feed - 100 or 110 hog rings per strip
- Designed for long service life and easy maintenance
- Low air consumption - use with standard compressors

### Benefits -

- Lower cost per connection
- Lower occurrences of installer injuries
- Lower labor costs - fewer man hours on the job

HC516

HC715 & HC716

### Pneumatic pliers & hog rings

#### HC516

Tool - uses 16 gauge 1/2" ring 3 lbs. HRPLPHC516

Ring - galvanized 11,000/ctn 9 HRP0516GB

Ring - stainless steel 11,000/ctn 9 HRP0516SB

#### HC715

Tool - uses 15 gauge 3/4" ring 3 lbs. HRPLPHC715

Ring - galvanized 10,000/ctn 17 HRP7515GB

Ring - stainless steel 10,000/ctn 17 HRP7515SB

#### HC716

Tool - uses 16 gauge 3/4" ring 3 lbs. HRPLPHC716

Ring - galvanized 11,000/ctn 15 HRP7516GB

Ring - stainless steel 11,000/ctn 15 HRP7516SS

# Earth Anchors & Miscellaneous Items

## Duckbill Earth Anchors

### Description -

- Made from aluminum alloy
- Works like a toggle bolt in soil
- Anchors will not rust and corrode
- Drive rods available for all sizes of anchors
- Maximum hold pulling against undisturbed soil
- Drive into ground with rod, anchor pivots on cable locking into place
- Comes attached to high strength galvanized or stainless aircraft cable with looped end

### Benefits -

- No rigid rods, pipes or stakes above ground to injure people & animals
- Anchor and cable flush with ground will not damage equipment
- Safer than conventional anchors
- Saves time and labor
- No digging required
- Easy to install

### Uses -

- Tree supports
- Fence support
- Theft deterrent
- Tie down small buildings
- Secure playground equipment
- Anchor bird pens and chicken coops

**DUCKBILL**  
EARTH ANCHORS

Anchors	wgt.	cable	holding	SKU
68-DB1	0.3 lbs.	1/8"x2-1/2' galvanized	1,100 lbs.	DB68DB1

DS-88	6	for 88-DB1 anchor		DBDS88

## Post Driver

### Description -

- Two handles for easy holding
- Heavy 30" long, 2-3/4" diameter pipe, closed at the top

### Benefits -

- Safer way to drive U and T posts - let gravity do the work

### Post driver with handles

30" 19 lbs. PPPDR

- Fence posts see [page 15](#)

## T Post Clips

### Description -

- Pre-formed wire tie to attach fence to post

### Benefits -

- Save time installing fencing

### T post clips - 25/bag

0.5 lbs. TCLIPS

- Fence posts see [page 15](#)

## Sod Staples

### Description -

- 8" long with 1" opening
- Formed from heavy 8 gauge wire

### Benefits -

- Easily driven into the ground
- Long enough to hold securely in ground

### Uses -

- Keeps bottom of fence anchored to the ground

### 8 gauge - 500/carton

1"x8" 46 lbs. CFU-PIN

# Miscellaneous Items

## Galvanized Coil Wire

### Description -

- Single strand coils
- 14 gauge Class 3 galvanized wound on wood spool
- 12-1/2 gauge hi-ten 200,000 psi Class 3 - Galv. & Black

### Uses -

- 12-1/2 gauge high tensile electric fence wire
- 14 gauge 25 lb. wood spool dispenser - 1/4 mile electric fence

### Galvanized wire

9 gauge	425'	25 lbs.	CWSM09025
9 gauge	1,700'	100	CWSM09100
12-1/2 gauge	2,000'	52	CWHT12
12-1/2 gauge	4,000'	105	CWHT124
12-1/2 gauge	2,000'	52	* CWHT12B
14 gauge	1,320'	25	ELWS1414

\* Black

## Safety Ties

### Description -

- UV stabilized for long life
- Black nylon zip ties - easy to use
- 1,000 per carton (10 bags of 100)

### Uses -

- Excellent for securing plastic meshes - will not chafe through

### Safety ties

7"	4 lbs.	PLSAFTIES7
11"	7	PLSAFTIES11

## Lacing Cord & Needles

### Description -

- Nylon cord UV treated
- Weave pieces of Top Netting together, make repairs
- Needle speeds work threading twine through netting

### Uses -

- Weave and make repairs to new and old netting

### Lacing cord & needles

1,000' spool	1 lb.	TNLACE
needles (4)		TNNEEDLE

# Wire Mesh Panels - pre-cut

### Description -

- Vinyl Coated (VC)
- Stainless Steel (SS)
- Galvanized After (GAW)
- Galvanized Before (GBW)
- Panels cut to custom sizes
- Minimum order quantities apply
- Variety of gauges and mesh sizes

### Benefits -

- Cost savings
- Saves time and labor
- No need to flatten mesh
- Easier to work with and install

### Uses -

- Trellis
- Window guards
- Machine guards
- Greenhouse benches
- Animal cages or traps
- Lighting fixture grilles
- Bannister safety panels
- Railing safety panel insert

### Standard Panels

#### Gauges

14	1"x1", 1"x2", 2"x2", 1/2"x3", 1-1/2"x4", 2"x4"
12-1/2	1"x1", 1"x2", 2"x2", 1/2"x3", 2"x4"
10-1/2	2"x2", 2"x4"

#### Mesh Sizes

#### Finishes

GAW, GBW, VC
GAW, GBW, VC
GAW, GBW, VC

- Lead times vary by product
- **Minimum order quantity:** 25 panels or total of 100' linear feet
- **Note:** panel finish availability varies by mesh size and wire gauge

### Custom Panels

Available in a wide variety of gauges, mesh sizes and materials, including GAW, GBW, Vinyl Coated, Plain Steel and Stainless Steel.

# Louis E. Page INC.

ESTABLISHED 1893

**Louis E. Page, Inc.** is a family owned business in continuous operation since 1893. We are excited to be celebrating our 125th anniversary. As in years past, we continue to offer you the widest product mix of wire and plastic mesh and fence and related items. We are your single source for all your wire mesh requirements.

We sell a large variety of welded and woven wire mesh specifications in Galvanized Before Weld (GBW), Galvanized After Weld (GAW), PVC coated (VC) and Stainless Steel (SS). We also sell many different types of plastic meshes.

As **specialty distributors** of all types of woven and welded meshes we purchase from and have access to many different mills, both foreign and domestic. The items shown in this catalog are a representative selection of the most common and readily available products. Space limitations prevent us from listing every single item. Please be sure to call us for information when you are searching for anything not listed on these pages, including:

- Heavy gauge woven and welded industrial wire mesh
- Wire mesh for railing and stairway safety inset panels
- Custom size pre-cut panels of GAW, VC and Stainless Steel meshes
- Copper and other alloy meshes in a variety of gauges and mesh sizes

We pride ourselves in our ability to find specialty, unique, hard-to-find products. And we look forward to having the opportunity to put our 121 years of knowledge and experience to work for you!

## ~ Information ~

**Catalog format** - this catalog is for descriptive purposes only. Dimensions, mill weights and description of items are included. No prices are listed.

**Prices** - are listed on our web site and are subject to change without notice. Invoices will reflect prices in effect *at time of shipment*. It is wise to check with us for current prices and availability before making a commitment to your customer.

**Payment terms** - normal terms (with credit approval): net 30 days from invoice date. Interest at the rate of 1.5% per month will be billed after 30 days. Other payment options: Discover, MasterCard, VISA, PayPal, certified, bank check or personal check (allow 10 days), money order or cash.

**Shipping** - we ship via common carrier with freight charges prepaid. Applicable freight charges will be invoiced to you. We ship small packages (up to 150 pounds) via UPS. We do not ship COD.

**Return policy** - all sales are final. We drop-ship products from various locations and cannot accept returns. Be sure you are ordering the items and quantities you need.

**Special order, non-stock and made-to-order items** - deposit with order is required. All sales are final.

**Damage** - you must make your own restitution with the delivering carrier for material damaged in transit. Any damage or shortage *must* be noted on receiving papers at time of delivery. Be sure to take pictures to support your claim.

**Office hours** - 8:30 AM to 4:30 PM EST, Monday through Friday.

Call toll free: **800/225-0508** ~ [sales@LouisPage.com](mailto:sales@LouisPage.com) ~ [www.LouisPage.com](http://www.LouisPage.com)

SPECIALISTS & DISTRIBUTORS  
Wire & Plastic Fence, Mesh & Netting

since 1893

## Wire Information

### 1. What is High Tensile Wire?

Agricultural fencing consists of low carbon wire or high tensile wire.

Low carbon wire is made from steel rod with carbon content of approximately 0.10%. This type of wire is easy to work with and fairly forgiving. However, it is prone to elongation compared to high tensile wire.

High tensile wire is made with higher carbon steel. The carbon content of this product is approximately 0.28%. This increased carbon content significantly increases the wire's strength and reduces elongation. This allows you to use a smaller diameter high tensile wire to replace a thicker low carbon wire.

High tensile wire can be installed using fewer posts than low carbon fence. The lighter weight makes high tensile fences easier to handle during installation.

Once properly installed, high tensile fences remain tight for years and requires very little maintenance. Low carbon wire begins to stretch and sag over time and requires regular maintenance.

You can build a longer lasting, low maintenance fence for nearly half the price of a conventional low carbon fence.

For more information, please visit our web site:  
[www.bekaertfence.com](http://www.bekaertfence.com).

Wire Diameter	High Tensile	Low Carbon
9 gauge	N/A	1030 lbs
10 gauge	N/A	860 lbs
10.5 gauge	1610 lbs	N/A
11 gauge	N/A	685 lbs
12.5 gauge	960 lbs	460 lbs
12.5 gauge (Fixed Knot)	1345 lbs	N/A
14 gauge	630 lbs	N/A
14.5 gauge	N/A	270 lbs
15.5 gauge	480 lbs	N/A

Breaking load of typical fence wires according to ASTM Standards.

### 2. What is Class 3 and ZA?

A good fence coating looks good for years and protects your fence from the elements. With Bekaert's expertise in coating technology, you can expect a long life from your fence.

Class 3 Galvanized coating is the standard on all of our brand name products. This coating is approximately 2.5 times thicker than the industry standard Class 1 Galvanized coating. Bekaert Class 3 products ensure long life and exceed ASTM A-121-07.

ZA, is our new zinc-aluminum hybrid coating, (95% Zn, 5% Al) developed and produced exclusively by Bekaert. It lasts more than twice as long as Class 1 galvanized, but uses less coating than Class 3 galvanized to save you money.

The latest addition to our line of coatings is our new painted finish which combines a color polymer paint with our ZA coated wire to give you longer fence life in attractive colors. This coating is designed for maximum protection in even the most corrosive environments.

Approximate Life of Galvanized 12.5 Gauge Wire	
Commercial Zinc:	No real standard - 3 months to 1 year until rust <sup>1</sup>
Class 1 Zinc:	2 to 11 years until rust in most non-coastal climates <sup>1</sup>
Zinc Aluminum:	More than twice as long as Class 1
Class 3 Zinc:	13 to 30 years until rust in most non-coastal climates <sup>1</sup>
ZA + Paint:	Up to twice the life of Class 3 Galvanized

<sup>1</sup> Documented by British Columbia Ministry of Agriculture (Agdex 724, Revised July 2002)
