Last year's

Grow Manufacturing Expo attracted over 2,500 students, educators and local businesses.

This Year's Expo Includes:

- Engineering & Technology Lab Tours
- Breakout Sessions
- Media Coverage from news outlets
- Exhibits and demonstrations by local manufacturers

Once again, manufacturers from Northern California will showcase their technology and products at California State University, Chico on Thursday, Oct. 3, from 9 a.m. to 3 pm. in the Bell Memorial Union Auditorium. Held the day before National Manufacturing Day, the 6th Grow Manufacturing Expo will focus on education and career opportunities for students and job seekers.

While the expo is not a job fair, each manufacturer displays a "job board" listing typical occupations within that company and the educational requirements for each occupation. For students nearing graduation, the event is an opportunity to meet potential employers and learn more about the companies. This is your opportunity as an Industry Champion to inspire and recruit the next generation of manufacturers!

NORTH STATE MANUFACTURING EXPO
