## **Apollo Receives The Visionary Award For The PRECISION-6 at AWFS 2017!**

Vista, CA. July 22, 2017

Apollo Sprayers International, Inc., a USA based leader in the manufacturing of HVL (High Volume Low Pressure) products for spray finishing, is the **WINNER** of this year's Visionary Award for Product Innovation in the Power Tool category at AWFS 2017 for their TWIN-TURBO PRECISION-6 production system.

John Darroch, CEO says "Wow, all I can say is Wow! We knew we had a great addition to the Apollo family, but now it has been confirmed by our industry peers". Darroch continues, "HVL manufacturers now have the validity that TrueHVL™ turbo spray systems are not for just DIY and home hobbyist's, but they are and always have been legitimate industrial production tools."

The key benefits of the TWIN-TURBO PRECISION-6 are the highest atomizing pressure of any system in the world (30% more powerful than a 5-stage turbine) and the lowest overspray, with 80+% or better transfer efficiency, simple to use and easy cleanup and maintenance. Backed by a 2-Year Limited Warranty, the PRECISION-6 closes the gap between air assisted airless technology and TrueHVL™ Turbo Spray Technology. The PRECISION-6 enables the painter to be able to atomize high viscosity, high solids paints and coatings with the soft, warm air from turbo technology, thus reducing the amount of coatings sprayed and ultimately reducing pollution, all while maintaining production speeds.

## **PRECISION-6 Woodworking Advantages**

- **REFINED ENGINEERING** - Apollo has optimized the performance of the PRECISION-6 Turbo Spray system to deliver exceptional production output and application speeds.
- **PRECISION** - Apollo's Pressure Control System (PCS™) controls motor speed, voltage and amperage while adjusting automatically for altitude and barometric pressure thus assuring continuous, precise atomizing air pressure wherever you are.
- **POWER, PROFITABILITY & GREEN** - Documented 80+% transfer efficiency and 38% savings on coatings when compared with compressed air systems, PLUS lower pollution for the environment.
- **NEW FEATURES:**
  - Throttle Back Control (TCB™) - Permits highest available flow pressure and increased motor longevity
  - LCD Message Center - Accurate Pressure Display – Motor Idle – Temperature and an Hour Use Meter

**Bottom-line...Apollo's PRECISION-6 is the key to your woodworking success!**
