

CYBER- SECURITY SEMINAR

JUNE 20

Cybersecurity & Your Business

The age of digital transformation is here and there is no denying that cyber attacks are on the rise. The Internet Crime Complaint Center within the United States Department of Justice recorded 298,728 cybersecurity-related complaints in its most recent report, with reported losses in excess of \$1.3 billion. Is your business prepared?

- The average cost of a data breach worldwide is more than \$3.5 million and cyber crime is projected to cost the world over \$6 trillion annually by 2021
- 60% of companies go out of business within six months of an attack, due to costs or loss of reputation
- 90% of small businesses don't use any data protection at all for company and customer information

Join Herbein + Company, Inc. and FOS (Herbein subsidiary) for a joint seminar on Cybersecurity and Your Business. We will be discussing information security, social engineering, vulnerability management, third party provider management, and taking a deeper dive into best practices including cyber insurance, vulnerability assessments, and social engineering training.

Speakers
