about kpi

KPI Partners provides strategic guidance and technology systems for clients wishing to solve their most complex and interesting business challenges involving cloud applications, big data, business intelligence, and data discovery.

A cloud-based reporting and analytics platform specifically built for human resource departments.

Overview

KPI Cloud Analytics helps enable companies to gain maximum return from Enterprise Resource Planning (ERP) systems quickly and at a lower cost than with other solutions. Users of KPI Cloud Analytics gain access to dynamic reports and powerful visualizations that are key for companies to drive insightful decision making.

The HR Function

Human Resource managers and executives are continuously challenged with increasing employee retention, improving employee recruitment, and ensuring pay for performance all while working towards aligning with the overall strategy of the business.

Teams within the HR department can often spend countless hours in a complex world dominated by spreadsheets and reports that are unique to the human resources function.

With KPI Cloud Analytics, empowered users can measure the performance of their workforce, identify trends, and easily tie together payroll and employee survey data together into a single report.

Business Intelligence

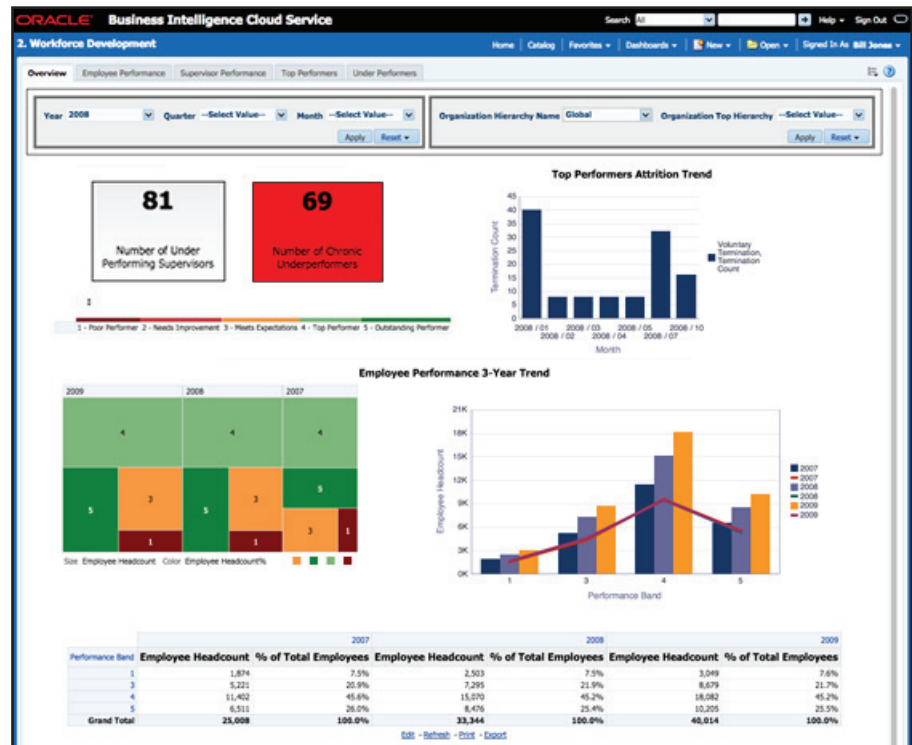

KPI Cloud Analytics enables you to manage your human resources function with key metrics so you can make timely, fact-based, decisions with dashboard analytics based on workforce, recruitment, and payroll.

All data can be viewed within advanced visualizations featuring key performance indicators (KPIs), graphical report snapshots, trend graphs, and scorecards.

hr dashboards

- Executive Overview
- Workforce Profile
- Workforce Development
- Retention
- Compensation
- Recruitment

The foundation of the KPI Cloud Analytics platform is the integration components connecting source data with cloud-based reporting and analytics.

KPI Cloud Analytics Platform

With any journey, challenges arise. KPI Partners is helping organizations maximize their investments in enterprise resource planning systems and third-party HR systems with easy-to-use cloud-based reporting solutions.

Product Demonstration

If your business could benefit from a modern cloud-based analytics solution that drives efficiency and helps identify opportunities to save on costs, our representatives are available to conduct a personalized demo and consultation.
