ready to use

- Pre-built dashboards
- Pre-built reports
- Pre-built ETL
- Pre-built data model

about kpi

KPI Partners provides strategic guidance and technology systems for clients wishing to solve their most complex and interesting business challenges involving cloud applications, big data, business intelligence, and data discovery.

A cloud-based reporting and analytics platform specifically built for organizations that use Oracle.

Overview

Specifically built for Oracle E-Business Suite, PeopleSoft, and JDE Edwards, KPI Cloud Analytics leverages the power of Oracle BI Cloud Service (BICS) to deliver dynamic reports and advanced visualizations within a cloud-based environment.

Ascending To the Cloud

KPI Cloud Analytics scales to empower users across your organization, from small workgroups to the enterprise, making agile business intelligence accessible to everyone.

KPI Cloud Analytics helps enable companies to gain maximum return from Oracle's Enterprise Resource Planning (ERP) systems quickly by connecting on-premise and cloud-based applications at a lower cost than other solutions.

All data can be viewed within advanced visualizations featuring key performance indicators (KPIs), graphical report snapshots, trend graphs, and scorecards.

Product Demonstration

If your business could benefit from a modern cloud-based analytics solution that drives efficiency and helps identify opportunities to save on costs, our representatives are available to conduct a personalized demo and consultation.
