

## Solutions for Content Processing for Insurance Agencies

Use intelligent content automation tools to streamline your document processes. Capture information from forms, view and collaborate on various file types, and simplify your claims process with our tools. Our solutions can help you increase productivity and streamline your insurance application, claims processing, and invoice automation.

### View Any File in Your Application

Don't compromise the security of your document by opening third-party applications. View any file type without leaving your application using PrizmDoc Viewer.

### Capture Information

With a simple integration, you can capture information in digital forms using our intuitive FormSuite SDK. Automate your common forms to pull data from form fields and capture the information more efficiently.

### Convert Files and Consolidate Data

Collaborate efficiently on all application files by converting emails, texts, Word documents, images, and more into a consolidated PDF. Securely view, annotate, and redact information within your own application using ImageGear.

### Automate Workflow Processes

Communicate and collaborate with internal and external stakeholders on loan, mortgage, car loan applications, and more. Connect our workflow management tool to your CRM or DMS to easily integrate more efficient workflows into your process.

## Intelligent search, collaboration, and file processing for insurance.

Using our unique integration and automation solutions, you can capture data, consolidate files, collaborate efficiently, and find information quickly. With our solutions for insurance applications, claims processing, invoice automation, and more, you can easily streamline the way your team collaborates.

### Invoice Automation

Ensure that your invoices are organized and searchable with a simple integration. When you add data capture, file conversion, and OCR into your application, you can process invoices more efficiently and organize files more productively.

### Reconciliation Claims

Don't trust third-party applications with sensitive information. View, organize, and collect data from claims with a simple integration to your current application. When you standardize the claims process, you can effectively process more reconciliation claims in less time.

### Manage Consumers

With powerful search capabilities, you can find information on a consumer quickly and efficiently. Using ImageGear or PrizmDoc with OCR Xpress, you can search multiple file types including text in images to obtain the data you need in seconds.

Discover a better way to manage your workflow and automate business processes with our document management tools. For more information on our insurance solutions, please contact [sales@accusoft.com](mailto:sales@accusoft.com).
