ARMODILO™

Overview

# Products

the original tablet transformer

Armodilo was the first company in North America to design and produce tablet display systems, and our commitment to innovation is what keeps us at the forefront of personalized digital signage.

From the inception of our 3-in-1 stand, which won a coveted EXHIBITOR Buyers Choice Award in 2012, we have since garnered many additional design and innovation awards for our highly elegant, innovative, and rugged line of tablet display enclosures, stands and kiosks.

With our reputation for innovative, high quality products, we work with some of the most distinguished brands around the world. We keep pushing the boundaries of tablet integration into commercial spaces – innovating when others imitate, continually reinventing the space we originally defined.

That's why our product line is the first choice for integrating tablet devices into high-traffic trade show, event, retail, hospitality, and healthcare environments.

Our clients recognize us as inventors and perfectionists, never ceasing to improve what we make and what we do. Between our products, our reputation, and our world class customer service, our clients come back to us again and again for their tablet deployment and hardware mounting solutions because we use the highest quality materials and production methods to create truly unique digital touch-points that get noticed and stand the test of time.

better by design

Functional, Flexible, Beautiful: From the very beginning, we've designed products that we ourselves would want to own and use: products that are rugged, innovative, functional and elegant. Our commitment to product quality shines through in everything we do.

Multi-tablet capability: Our Original line of enclosures are the **only** true multi-tablet capable enclosures on the market. Our patent-pending swappable Tablet Fit Kits™ let you upgrade your touch-point hardware without the need to replace the whole enclosure.

Wi-Fi & cellular signal transparency: Unlike other tablet enclosures on the market, our products are designed to ensure wireless signal transparency. Inexpensive bent metal enclosures are notorious for bad signal quality, but we make sure you won't go offline.

Personalized Branding: Our enclosures look great, but we've designed them to help you look great, too. With a variety of personalized branding options, we can make sure all eyes stay on you.

Customized Add-Ons and Peripherals: Whether you need power or home button access, card reader integration, keyboards, a headphone hanger, or an attached shelf, our goal is to ensure your display is perfectly customized to your needs.
Award-Winning Lineup

We've been recognized around the world for our quality product designs, from trade shows and events to interior design, the global community is noticing. It all started in 2012 with a coveted EXHIBITOR Buyers Choice Award for the 3-in-1 tablet stand — our very first product! Since then, we've received additional awards for AURA™, Sphere™ and our Original line of tablet stands.

We were also named the #1 Digital Display Trend at (DSE) Digital Signage Expo in Las Vegas in 2013, introducing the digital signage industry to what we've dubbed "Personalized Digital Signage".

personalized
digital signage

We work with each and every one of our clients to find the best solution for their needs. From initial project assessment through to final delivery, our team obsesses over the details – each of our clients requires a unique solution for their environment and we are always happy to provide guidance to help you succeed.

Beyond our industry leading service and support, our products are designed to be unique, attention grabbing and rugged, exactly what you require them to be. From our fun and quirky Sphere™, to our versatile and brandable new Xero™, or to our jaw-dropping LITE™ installations our diversified product selection ensures project success.

We are the only company in the industry where innovation starts with the client. From power button access and faceplate branding on our Original line through to full colour custom graphics for our Xero™, LITE™ and AURA™ stands, Armodilo "stands" for personal-ized digital signage products, service and support.

Tablet Fit Kits™ –
One Enclosure, Any Tablet

Each of our Original stands and enclosures comes with one of our Tablet Fit Kits™ for the tablet of your choice. If you ever choose to use a different tablet of similar size, rather than replace the stand, all you need is a new Tablet Fit Kit™. We currently support over 60 tablets, and if your device isn't on our list, we'll create a custom Fit Kit for your needs, quickly, simply, and inexpensively – now that's personal!

9

100% north american

Personalized design and innovation are just the beginning, we're also proud that all of our products are designed and manufactured in North America.

Our diverse in-house team includes experts in graphic and product design, fabrication and print-production to ensure the highest product quality.

Additionally, we work with local partners to handle specialized production processes, including metal cutting, fabrication, injection molding, painting and finishing. Keeping our design and production in-house and local ensures a much more responsive process

for our clients and gives us the tight quality control we need to confidently offer a **lifetime warranty** on all of our products.[†]

We maintain our unprecedented level of client satisfaction through our highly effective communication throughout the sales process, and by ensuring product quality with our in-house production team, local partners, and two-pass quality control. That's because when you choose Armodilo, we want you to invest in your brand with confidence.
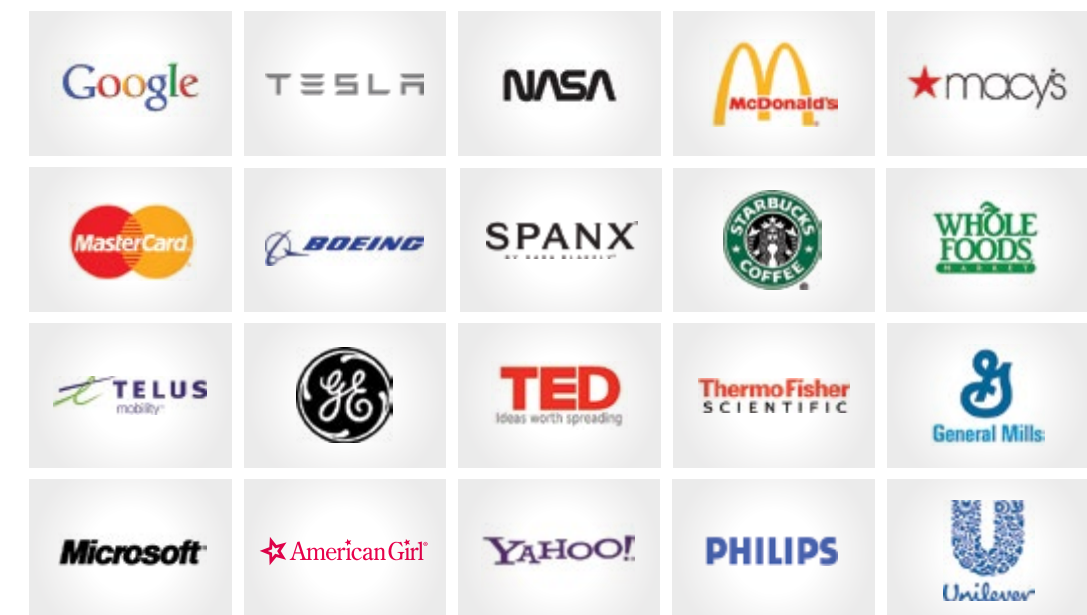

Armodilo Surface being used at the American Express Championship Experience (U.S. Open in Pinehurst, N.C.), offering attendees a variety of customized experiences including professional-grade swing analysis, golf fitness assessments and a U.S. open photo opportunity.

trusted the world over

Organizations choose Armodilo products when their **brand equity matters**. We deliver the most innovative and design-oriented enclosures, stands and tablet kiosks on the market, and our clients know that our North American made products will stand the test of time.

If you're planning on using interactive touch-points at events, in retail, for professional services or beyond, trust the company that developed the original tablet transformer that is installed and loved worldwide.

3-in-1

Our 3-in-1 tablet stand is our original multi-purpose digital signage solution. Designed to be highly versatile, lightweight and rugged, the 3-in-1 works as a free-standing, desktop or wall-mountable display that is easy to set up or pack away in our optional soft bag or hard shell aluminum carrying cases for a world-class trade show and event experience. The 3-in-1 won the coveted EXHIBITOR Buyers Choice award in 2012 for its build quality and unmistakable beauty.

- 3-in-1 enclosure (freestanding, desktop and wall-mount) with a secure, fully enclosed ABS plastic tablet housing
- Award-winning design
- Lifetime Warranty†
- Lightweight aluminum for easy transportation and reduced shipping costs
- Multi-tablet capability using our Tablet Fit Kit™ system
- ArmoLock™ security screws (stronger than traditional lock and key systems)
- Set up in landscape or portrait mode
- Fully integrated cable routing for a cable-free look
- Optional carrying case or bag options
- Many accessory and upgrade options available

Floor

Our Floor tablet stand offers the same high quality build and profile as the 3-in-1, but in a single configuration, making it the perfect freestanding tablet solution. The design of the Floor stand is based on the award-winning 3-in-1, except with the simplicity of using only a single configuration. Like the rest of our Original products, the Floor stand offers true multi-tablet compatibility with our patent-pending Tablet Fit Kits™.

- Freestanding enclosure with a secure, fully enclosed ABS plastic tablet housing
- Award-winning design
- Lifetime Warranty†
- Lightweight aluminum for easy transportation and reduced shipping costs
- Multi-tablet capability using our Tablet Fit Kit™ system
- ArmoLock™ security screws (stronger than traditional lock and key systems)
- Set up in landscape or portrait mode
- Fully integrated cable routing for a cable-free look
- Optional carrying bags
- Many accessory and upgrade options available

Curve

Curve is an elegant, static desktop solution that provides a free-sitting tablet display option. The single piece curved aluminum base is graceful, yet tough, and its viewing angle is ideal for content display. Optional mounting holes provide the choice of mounting the Curve to any surface for enhanced theft determent and security. The tablet housing can be mounted vertically or horizontally during setup.

- Curve desktop enclosure with a secure, fully enclosed ABS plastic tablet housing
- Lifetime Warranty[†]
- Multi-tablet capability using our Tablet Fit Kit™ system
- ArmoLock™ security screws (stronger than traditional lock and key systems)
- Set up in landscape or portrait mode

Shown in Sky White   Shown in Gun Metal Grey   Shown in Black

Surface

Surface is a wall or desktop mountable tablet display solution that provides enhanced interactivity and movement of the display through optional add-ons. The ArmoTwist™ add-on allows for up to 360˚ rotation and 50˚ pivoting movement of the enclosure head in any direction, and a rotational base option is also available to further extend its versatility.

- Surface desktop or wall-mountable enclosure with a secure, fully enclosed ABS plastic tablet housing
- Lifetime Warranty†
- Multi-tablet capability using our Tablet Fit Kit™ system
- ArmoLock™ security screws (stronger than traditional lock and key systems)

Spot

Spot is a rugged enclosure designed to be fun and inviting. With the flexibility to be set down in either landscape or portrait mode, Spot is ideal for delivering hands-on interactive experiences in any environment. If you need your tablets to be easy to pick up and set down, then Spot is the enclosure for you. Spot provides our renowned tablet security and an optional Kensington security plug add-on if you wish to tether it down.

- Spot desktop tablet enclosure with a secure, fully enclosed ABS plastic tablet housing
- Place it on any surface, pick it up, move it around
- Lifetime Warranty†
- Multi-tablet capability using our Tablet Fit Kit™ system
- ArmoLock™ security screws (stronger than traditional lock and key systems)
