

# ROOF PRO GENERATORS

Heavy Duty Portable Power

## 18,000W GENERATOR

The Roof Pro 18,000W Generator is a beast. Armed with the most powerful open-air-cooled engine possible, this innovative power source will supply enough clean, consistent power to keep multiple parts of a project moving forward.

## 12,000W GENERATOR

The Roof Pro 12,000W Generator produces the clean, consistent power your equipment requires, so your team of roofing contractors can deliver high-quality work on time, every time.

## 18K

- Simultaneously power two 240-Volt welders or one 240-Volt welder, and up to three 120-Volt hand tools.
- Durable Briggs & Stratton Vanguard commercial grade engine
- 7 hours of run time at full load (15 gallons)
- EPA compliant.

## 12K

- Simultaneously power one 240-Volt machines and three 120-Volt tools
- Durable Honda GX630 engine
- 9 hours of run time at full load (15 gallons)
- Narrow width
- CARB & EPA compliant

## STANDARD FEATURES:

- **Easy ground-to-roof transport:** No special harness required.
- **Effortless on-deck maneuvering:** Easily roll the generator around a deck and lock it into place.
- **Clean, consistent power:** Eliminate power fluctuations that can impact machine performance.
- **Made in the U.S.A.**
