

David J. Cahn, MD

Fellowship-trained in neuro-urology

OVERVIEW

Dr. Cahn founded Foothills Urology in 2000 on the philosophy that the latest evidence-based medical treatments could be offered to patients in a small, personalized practice — a belief that has made Foothills Urology a leading urology practice in the Denver metro area. One tenet fundamental to Foothills Urology is that every patient will be seen by one of the four board-certified urologists who will continue to see that patient throughout his or her care.

Dr. Cahn brings years of extensive experience to complex urological conditions that require surgical intervention. Involved with InterStim® technology since its approval by the Food and Drug Administration (FDA) in 1998, Dr. Cahn is one Colorado's most experienced minimally

invasive surgeons treating overactive bladder. Dr. Cahn also specializes in advanced prostate cancer while still maintaining an active general urology practice.

Training

- › Completed residency in urology at Montefiore Medical Center in Bronx, New York
