Allen Eaves is the Director of Information Security and Compliance Service for Gladiator®, a division of Jack Henry and Associates, Inc.® In this role, Allen leads teams of IT security, fraud detection, development, business continuity planning, and regulatory compliance experts to provide industry-leading solutions for financial institutions throughout the United States.

With 14 years of experience in the information security and financial services industry, and having worked with hundreds of financial institutions across the United States, Allen has extensive knowledge of technical, regulatory, and procedural challenges facing the industry today.

As an Information Security Engineer, Allen began his career configuring and monitoring information and network security systems. In this role, he was responsible for analyzing cyber attacks and designing systems and measures to provide effective network and information security. Allen went on to manage the team responsible for the implementation and configuration of Gladiator's security and fraud solutions. He led a team of information security professionals to achieve well-designed system configurations, including the deployment of more than 1,000 security systems that incorporate firewalls, Network Intrusion Prevention Systems, and server monitoring tools.

Currently, Allen directs the product management, research and design, and IT regulatory compliance functions of Gladiator security services. Allen is a regular speaker at Jack Henry & Associates conferences including the Jack Henry Annual Conference and the Symitar Educational Conference. He also travels throughout the United States. discussing the information security risks facing today's financial institutions.

Allen earned a Bachelor of Business Administration degree from the University of Georgia Terry College of Business and holds designations as a CISSP (Certified Information Systems Security Professional), CFE (Certified Fraud Examiner), CRISC (Certified in Risk and Information Systems Control), CISM (Certified Information Security Manager), and SSCP (Systems Security Certified Practitioner). Allen also works with fellow information security professionals to develop certification examinations and passing criteria for the International Information System Security Certification Consortium (ISC)2 including the SSCP and CISSP.
