

Start Selling MailChannels Cloud

Offer your customers a secure and reliable email delivery service that filters outbound spam from your network and gets your mail delivered. Our powerful tools protect your IP reputation.

Our Advantages

Build Recurring Revenue

Grow your business by offering an SMTP relay service that blocks outbound spam and protects customers from infection.

WHMCS

Manage sub accounts, account statistics and billing within WHMCS, or ask about our Reseller API to roll your own integration.

Wholesale Pricing

Attractive wholesale pricing enables you to earn up to 400% margins.

Secure Your Mail Infrastructure

Have your email monitored by a team of email security experts. The more widely you deploy, the more secure your network becomes.

Improve Customer Satisfaction

Eliminate IP blacklisting to reduce support tickets related to email and retain more customers.

Increase Email Deliverability

Let our SMTP infrastructure analyze and ensure your hosting customer emails reach the inbox.

Expand Your Offerings

Quickly deploy MailChannels Cloud and send your hosting customer email through one reliable email delivery service.

Unlimited Sending Sources

You can send from unlimited email addresses, applications, and domains. There's no need to verify sending domains.

Set Your Own Pricing

Our WHMCS Module makes it simple to build custom pricing plans that your customers can use to get their email delivered.
