## GALsync

### Global Address List Synchronization

Do you have multiple Active Directory forests that need share GALs?

Has your company recently merged with another company?

Looking for a simple way to synchronize GALs and share free/busy information?

### GALsync Makes It Easy To Integrate Multiple Active Directory Forests

GALsync is an easy-to-use and cost-effective solution that allows you to share Exchange mail-enabled objects between forests. Sharing objects help users in one or both messaging organizations to access information about users and groups of the opposite Active Directory.

GALsync supports InterOrg free/busy replication between Exchange messaging organizations, which allows users to view free/busy calendar information for Microsoft Exchange contacts. Access to data between untrusted forests is also provided for Exchange versions 2000-2013 as well as Office 365

#### FAST INSTALLATION

Install and configure in less than 1 hour.

#### EASY SETUP

Configuration is done by wizards which walk you through each step.

#### NO EXTRAS NEEDED

No additional software, hardware, or database is required.

#### NO SECURITY RISK

No security risk at your firewall, and no additional firewall port is required.

#### TRUSTS NOT REQUIRED

Does not require any trusts between exchange organizations.

#### ACCESS TO AVAILABILITY

Does not require any access to Availability Service through internet.

GALsync is one of those products that does exactly what it advertises. It's easy to install and configure. The GUI was polished and easy to work with. GALsync is cost-effective and feature-rich.

-J. Peter Bruzzese, MVP

## Common Directory Synchronization Scenarios

### MULTI-FOREST COMPANY DEPLOYMENT

Some companies have deployed multiple Active Directory structures and users cannot find the mail address of colleagues located at the other sites in Outlook's Global Address List.

### MERGERS & ACQUISITIONS

After a merger or acquisition, it is necessary to integrate different Active Directories and Exchange organizations.

GALsync streamlines the process of sharing all or subsets of user and group information for Outlook/Exchange users in the Global Address List.

### SHARE ADDRESSES WITH YOUR PARTNERS

If your company has a partner company with whom you collaborate on a regular basis, GALsync will enable you to share some user and free/busy information for Outlook and Exchange users in the Global Address List.

### MIGRATION

When it comes time for your company to migrate to a new Exchange organization, GALsync ensures that all migrated users may send messages to users in their original organization and vice versa.

## System Requirements

Windows Server  
2008 through 2012 R2

Resources:  
Disk Space 350 MB  
Memory 2 GB

Additional Software:

Microsoft NET Framework	2.0 or later
Powershell	2.0 or later

OUR LOYAL CUSTOMERS  
Trusted by customers in over 130 countries.

## ABOUT ENOW

ENow is a Microsoft ISV focused on building software tools that simplify the job of IT administrators. Reducing downtime and increasing yours is our goal. Our innovative systems management software provides robust monitoring and reporting features for all key components of the Microsoft infrastructure, including Office 365, Exchange, Active Directory, SharePoint and Teams all delivered in our award winning personalized dashboards.
