

## Training Fact Sheet

With training and certification, you will learn to master Juriba Dashworks® capabilities through hands-on, real-world instruction to help you meet your goals. The training offered is a combination of video based, online instructor-led and in-person training tailored to your requirements. Whichever path you choose, you will learn to be successful with the Dashworks Platform.

Companies are looking for proven professionals—and companies that use certified professionals see smoother deployments and better use of Dashworks. Getting certified boosts your career and sets you up to contribute even more to your organization's success. Once you are Dashworks certified, you can gain industry recognition, competitive differentiation, greater productivity and results, increased user community satisfaction, and a tangible measure of your educational investment.

## Which Training Path Is Right?

### Implementer

Deploy the platform within a defined scope of work.

The technical Dashworks implementer path will teach you to quickly and successfully deploy Juriba products into customer environments, whether you are a new consultant starting your career or a seasoned professional looking to deepen your expertise and differentiate yourself from the competition.

### Administrator

Manage and configure the Platform.

Discover the most essential elements of managing and maintaining the Dashworks Platform.

The Dashworks Project Administration path will teach you how to configure and manage all aspects of a migration project and create repeatable frameworks for future use.

### Analyst

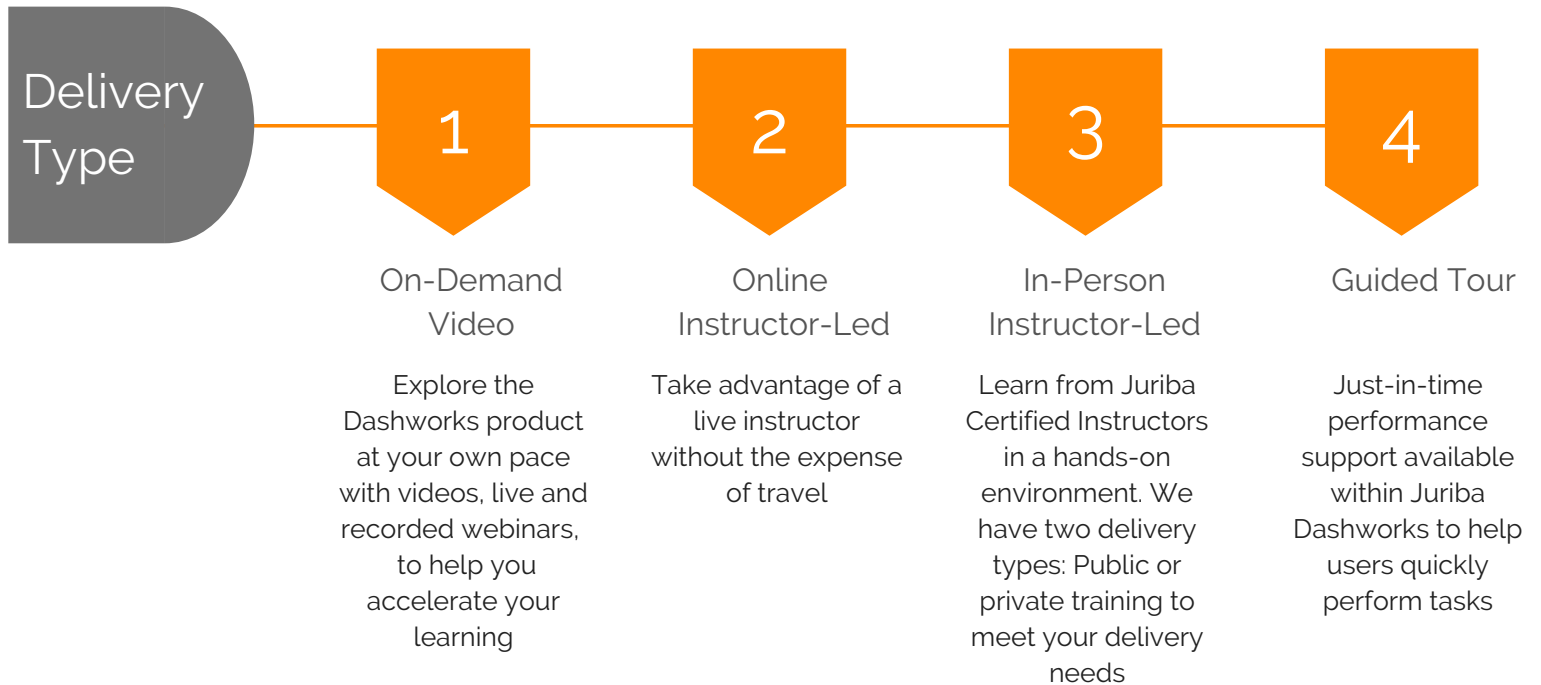

Operate the Platform.

Discover the most essential elements of operating the Dashworks Platform.

The Dashworks Analyst path is designed for resources that use the system on a day to day basis to manage tasks and status updates within a project. You will learn how to manage project data, build data extracts, update tasks and dependencies and co-ordinate end user email and validation/scheduling.

## Training Delivery Types

# Courses

Dashworks Overview (All Roles - All Courses)				On-Demand Video
Dashworks Overview Presentation	Im	Ad	An	17:51 Mins
Dashworks Evergreen Demonstration	Im	Ad	An	16:36 Mins
Dashworks Projects Demonstration	Im	Ad	An	29:02 Mins

Implementation Specialist, Project Administrator, Analyst

Dashworks Implementation (Installation & Configuration)				On-Demand Video
Dashworks Implementation Overview	Im			4:36 Mins
Installing Dashworks Database Components	Im			16:30 Mins
Installing Dashworks Web Server Components	Im			16:22 Mins
Active Directory Data Import Configuration	Im			7:19 Mins
Microsoft SCCM Data Configuration	Im			14:13 Mins
Dashworks Analysis+ (Flexera Data Platform)	Im			7:50 Mins
Setting Up Email Notifications (SMTP)	Im			6:46 Mins

Implementation Specialist

# Courses

## Dashworks Project Administration (Project Setup & Configuration) On-Demand Video

Creating A New Project	Im	Ad		6:09 Mins
Managing Request Types & Categories	Im	Ad		6:53 Mins
Managing Stages & Dependency Tasks	Im	Ad		12:22 Mins

Managing Teams & Groups	Im	Ad		7:36 Mins
Managing Automations	Im	Ad		9:54 Mins

Implementation Specialist, Project Administrator

# Courses

Dashworks Navigation (Using Dashworks)			On-Demand Video
Introduction To Dashworks Evergreen UI	Im	Ad	An 9:26 Mins
Understanding Dashworks Evergreen Objects	Im	Ad	An 12:53 Mins
Using Bulk Update	Im	Ad	An 8:52 Mins
Introduction To Dashworks Project System	Im	Ad	An 3:54 Mins
Understanding Dashworks Project Objects	Im	Ad	An 13:10 Mins
Computer and User Dashboards	Im	Ad	An 7:20 Mins
Managing Application Objects In A Project	Im	Ad	An 9:52 Mins
Pre-Canned Project Reporting	Im	Ad	An 9:47 Mins
	Implementation Specialist, Project Administrator, Analyst		

# About Dashworks

Juriba Dashworks is a software platform designed to help organizations manage their end user IT migration projects. It consists of two major components: Dashworks Evergreen and Dashworks Projects. Evergreen hosts the data warehouse and is the cornerstone for your reporting needs. Bolt-on Dashworks Projects modules can be added depending on your needs: Desktop & End User (Win 10, WaaS, H/W Refresh, App Rollout etc) and/or Email & Collaboration (O365, Exchange Online etc).

## Dashworks Evergreen

Before any project manager can tackle their IT migration project, they need to understand what their software and hardware estate looks like today. Dashworks Evergreen is the data warehouse which serves as your dynamic baseline for critical user, computer, application, mailbox, and mobile device information. You can browse, analyze, report and view the data in one central command & control center before creating your executive reporting graphical dashboards.

Dashworks Evergreen is scalable, robust and built to support all your data warehousing needs:

- Supports multiple connectors to common data repositories, and CSV import standards
- Leverages mature ETL process and incremental/parallel methods for speed
- Includes intelligent data aggregation and cleansing techniques
- Intelligent search facility, multiple dashboards (ability to drill, cut, slice and dice data, and the ability to quickly identify asset compatibility)

## Dashworks Projects

Dashworks Projects provides your IT migration team with the ideal platform to create the workflows, processes, communications and reports to manage your IT transformation projects from inception to completion.

The Project System is available in two modules: Desktop and/or Email & Collaboration. Each can be used for a variety of end user IT migration use case scenarios.
