

dashworks

Significantly Reduce the **Risk and Cost** of **Enterprise IT Transformation.**

Juriba Dashworks is an Enterprise IT Migration Management Platform specifically designed **for strategic-thinking IT project managers** who are frustrated with the inefficiencies and uncertainties of managing complex IT migrations by using out-of-date spreadsheets and hand-cranked databases.

Enterprises all around the globe have used Juriba's data warehousing and project management solution to successfully ready more than 5 million assets for migration - with tangible business results. Our customers enjoy an **increased Return-on-Investment of 15%**, an accelerated project timeline by around 65%, and 30% cost savings over manual spreadsheet methods with dynamic real-time dashboards and data updates.

- **Central Project Command & Control** - Ability to track thousands of interrelated activities, quickly determine candidacy, manage capacity, as well as find and eliminate bottlenecks.
- **Single Version Of The Project Truth** - One place from which to manage, maintain, and control thousands of project activities to drive resource efficiency for faster and more intelligent planning, scheduling & deployment.
- **Automation of common but tedious tasks** - Take the pain out of otherwise labor-intensive and time-consuming project tasks. For example, sending tonight's migration list to third party deployment tools.
