The evolution continues with the new X5200 UVIR Flame Detector. The X5200 combines the technologies used in the X2200 and X9800 to provide unparalleled detection capabilities and immunity to extraneous sources, combined with a superior mechanical design. The mounting arrangement allows the UV and IR sensors to monitor the same hazardous location with a 90 degree cone of vision. When both sensors simultaneously detect the presence of a flame, an alarm signal is generated. The detector has Division and Zone explosion-proof ratings and is suitable for use in indoor and outdoor applications.

The standard output configuration includes fire, fault and auxiliary relays. An optional 0 to 20 mA output with HART can be provided in addition to the three relays. A model with pulse output is available for easy retrofitting into existing Det-Tronics controller based systems. Auxiliary relay and 0 to 20 mA output are not available with the pulse model. A tricolor LED on the detector faceplate indicates normal condition and notifies personnel of fire alarm or fault conditions.

The X5200 housing is available in aluminum or stainless steel, with NEMA 4X and IP66 rating.

Typical applications include:
— Munitions
— Petrochemical applications
— Turbines.

**Features and Benefits**

- EN 54-10 Certified (VdS).
- ATEX Directive compliant.
- EQP models available.
- A new level of false alarm rejection.
- Responds to a fire in the presence of modulated blackbody radiation (i.e. heaters, ovens, turbines) without false alarm.
- HART models available.
- High speed capability.
- Microprocessor controlled heated optics for increased resistance to moisture and ice.
- Automatic, manual or magnetic optical integrity (oi) testing — no external test lamp required.
- Easily replaceable oi plate.
- Fire, fault and auxiliary relays standard.
- MODBUS RS-485 communication.
- 0 to 20 mA isolated output (optional).
- Pulse output for compatibility with controller based systems (optional).
- A tricolor LED on the detector faceplate indicates normal condition and notifies personnel of fire alarm or fault conditions.
- Mounting swivel allows easy sighting.
- Integral wiring compartment for ease of installation.
- Class A wiring per NFPA-72.
- Meets NFPA-33 response requirement for under 0.5 second (available when model selected).
- RFI and EMC Directive compliant.
- Built-in data logging / event monitoring.
Operating Voltage
24 Vdc. Operating range is 18 to 30 Vdc.

Power Consumption
2.8 watts @ 24 Vdc minimum.
17.5 watts @ 30 Vdc with EOL resistor installed and heater on maximum.

Relays
Contacts rated 5 amperes at 30 Vdc.

   Fire Alarm:  — Form C (NO and NC contacts)
   — normally de-energized
   — latching/non-latching.
   Fault:  — Form A (NO contacts)
   — normally energized
   — latching/non-latching.

   Auxiliary*:  — Form C (NO and NC contacts)
   — normally energized
   — latching/non-latching.

Current Output*
0–20 mA, with a maximum loop resistance of 500 ohms from 18–19.9 Vdc, 600 ohms from 20–30 Vdc.

Temperature Range
Operating:  –40°F to +167°F (–40°C to +75°C).
Storage:  –67°F to +185°F (–55°C to +85°C).

Humidity Range
0 to 95% relative humidity, can withstand 100% condensing humidity for short periods of time.

Field of View
The X5200 has a 90 degree cone of vision with the highest sensitivity lying along its central axis.

Warranty
3 years.

Enclosure Material
Copper-free aluminum or 316 stainless steel.

Conduit Entry Size
3/4 inch NPT or 25 mm.

Shipping Weight
Aluminum: 6 pounds (2.75 kg).
Stainless Steel: 10 pounds (4.5 kg).
